

COSENTINO®

NON-FINANCIAL INFORMATION STATEMENT 2025

SILESTONE® | DEKTON® | ECLOS® | SENSEA

REV 01 02/2026

INTRODUCTION

ABOUT THE NON-FINANCIAL INFORMATION STATEMENT

We are pleased to present the Cosentino Group's Non-financial Information Statement for 2025, a demonstration of our commitment to sustainability in its different dimensions and the cornerstone of our ESG Strategy, guaranteeing transparency and accessible information.

By publishing this statement, we invite our stakeholders to gain insight into matters relating to our business model and strategic objectives, as well as global economic, social and environmental performance in 2025, both in Spain and in the other countries in which we operate.

This Non-financial Information Statement (NFIS) fulfils the legal requirements set out in Law 11/2018 of 28 December 2018. For ease of reference, we have also used the Global Reporting Initiative (GRI) standards as a basis.

The scope of the information reported coincides with the scope of the financial information contained in the Group's annual accounts. This work follows on from the reports published in prior years and deepens our resolve to provide our stakeholders with transparent annual reports, in addition to making a positive impact wherever we operate.

GLOBAL PRESENCE AND ASSETS IN OUR SECTOR

Countries

→ 113 Distribution

Countries across five continents where we sell our products.

→ 36 Implementation

Countries in which we are present.

→ 47 own subsidiaries

Business Units

→ 8 Production plants

SPAIN

- 3 Silestone® factories.
- 1 plant for preparation of raw materials.
- 1 plant for special finishes and manufactured products.
- 1 plant for samples.
- 1 Dekton® plant.

BRAZIL

- 1 granite factory.

→ 11 Workshops (Workshops for cutting kitchen and bathroom worktops.)

- 10 workshops for cutting kitchen and bathroom worktops in the USA.

- 1 plant for special products in Spain.

→ 1 Logistics Platform

Smart logistics platform (Spain).

→ 4 Hubs in the US

→ 178 Business and sales units

- 132 Cosentino® Center
- 43 Cosentino® City
- 3 Cosentino® Studio

→ 5 Logistics operators

→ 2 Warehouse spaces

- Over 19,000 m2 for storing display slabs at our corporate head office.

- One logistics centre that includes a smart warehouse capable of storing up to 400,000 Silestone® and Dekton® slabs and preparing over 10,000 slabs every nine hours on shipping frames (by sea or land).

THIS IS WHO WE ARE MEANINGFUL DESIGN TO INSPIRE PEOPLE'S LIVES

Meaningful

We seek to live responsibly, at one with nature and the environment we inhabit, practising a rational and reasonable way of life.

Design

We inspire and are inspired to create beautiful, functional designs that come to life.

People's

People are at the heart of our business, and we aim to improve their lives and contribute to their well-being.

Lives

We have just one life, which we can live in many different ways; our products are designed to adapt to and anticipate the real needs of society.

OUR BRANDS, A GUARANTEE OF QUALITY AND INNOVATION

Our brands respond to the needs of a constantly evolving market with a clear aim: to create design spaces that are functional and have a purpose.

At Cosentino® we specialise in the design, production and distribution of architectural and decorative solutions. To this end, we create top-quality brands and products that provide sustainable, innovative and functional solutions for homes and public spaces alike, making us the ideal partners for interior designers and architects.

Our pioneering brands are renowned for the excellence of their finishes: Silestone®, ECLOS®, Dekton® y Sensa by Cosentino®, all leaders in their respective segments. Thanks to the solutions they provide, we build innovative surfaces that enable us to conjure up unique spaces and designs.

OUR STRATEGIC VISION: A HOLISTIC OUTLOOK

An overview of the context.

We understand our environment in order to anticipate and adapt to the new scenarios.

The last few years have been hard for everyone. The pandemic, armed conflicts and the energy crisis, among other factors, have generated major upheaval and a growing need to make a firm commitment to a business and societal model in which resilience is key.

Thanks to the efforts and responsibility of the entire team at Cosentino, we have been able to address these concerns and difficulties and sustain Group results in 2025. This, added to the strength of our business purpose, where innovation and sustainability play key roles, has been reflected in our investments in renewables, circularity, new production facilities and the expansion of our global presence. These actions have all kept our brands at the forefront of the sector.

Although the current uncertainty will be a constant presence in the coming years, the construction sector is expected to grow. Specifically, from 2027 onwards, the residential segment is forecast to grow by 5% in Europe and more than 7% in North America.

We are facing this trend from our position as leaders, while we innovate and diversify in the potential application of our products, sales channels and geographical presence. Thus, in the years ahead we will be looking at a scenario of opportunities in which we can continue to make progress.

Nevertheless, we are aware that we face a constantly changing environment. In this context, we have identified a number of risks and opportunities for which we have been preparing, for instance:

- An unstable and changing environment, in which the industry is undergoing rapid transformation due to geopolitical tensions, trade conflicts and changes in product regulations, with the global uncertainty index at record levels.*
- Saturated market, due to aggressive low-cost competition, mainly from Asia, which is growing rapidly with good quality and little differentiation.*
- Risk of commoditisation, with high pressure on prices in high-volume sectors and the mid-range retail segment.*
- Effects of climate change, which are beginning to take on ever more drastic forms and for which we must establish effective strategies.*
- New trends that are becoming increasingly deep-rooted in consumers, such as the search for spaces that adapt to their current needs or the growing demand for more durable and responsible products. An unstable and changing environment, in which the industry is undergoing rapid transformation due to geopolitical tensions, trade conflicts and changes in product regulations, with the global uncertainty index at record levels.*
- Saturated market, due to aggressive low-cost competition, mainly from Asia, which is growing rapidly with good quality and little differentiation.*
- Risk of commoditisation, with high pressure on prices in high-volume sectors and the mid-range retail segment.*
- Effects of climate change, which are beginning to take on ever more drastic forms and for which we must establish effective strategies.*
- New trends that are becoming increasingly deep-rooted in consumers, such as the search for spaces that adapt to their current needs or the growing demand for more durable and responsible products.*

At Cosentino we are proactively addressing these realities, promoting projects and initiatives to help us capitalise on opportunities and minimise any adverse effects.

WE ANTICIPATE RISKS IN ORDER TO MANAGE AND CONTROL THEM

RISK MANAGEMENT

We have several identification, control and management systems in place, as well as preventive and corrective actions, which enable us to anticipate, avoid or mitigate the risks we face as a company. We use a number of tools for this, such as:

- **Group global risk management programme**, which seeks to mitigate any potential adverse effects on our economic and financial profitability. Given the uncertainty of the markets, it considers financial market, credit and liquidity risks.
- **Preventive or corrective action**: which we define for each risk identified in our annual review.
- **SWOT Matrix**, which we use to analyse Cosentino Group's weaknesses, risks, strengths and opportunities. This is a comprehensive analysis encompassing the vision of the various areas such as Finance, Innovation, Internal Audit, Procurement, Health & Safety, People, Commercial Processes, Logistics, Quality and Environment.

The matrix is included in our Annual Strategic Plan and is reviewed by management.

Risk map

In December 2025, we updated the corporate risk map for the 2026–2027 period, identifying a number of operational and strategic threats. These were classified by criticality level based on their residual risk, and officers were appointed to monitor the most pressing ones. These officers will be responsible for leading the action plans to mitigate, avoid or transfer these contingencies.

The main risks that have currently been identified include:

- Risks associated with occupational health and safety in the value chain.
- Global geopolitical tensions, which can lead to protectionist trade policies, the introduction of tariffs, and disruption to the supply chain.
- Increase in competing manufacturers, especially in Asia, where they operate at lower costs and exert pressure on competitiveness in key categories.
- Cybersecurity, which poses growing challenges from the rise of artificial intelligence and digitalisation.
- Impacts of climate change, such as prolonged droughts and severe storms, which require plans to ensure operational continuity.
- Failure to take advantage of optimisations derived from artificial intelligence, which could limit efficiency and competitiveness.
- Volatility in currencies and financing conditions, with a potential impact on profitability and investment.
- Attracting and retaining talent, which is becoming more complex in a competitive labour market

In addition, during 2025, within the Audit and Control Committee, we monitored the indicators and action plans related to the most critical threats identified in the risk map.

DOUBLE MATERIALITY ASSESSMENT

Cosentino continues to reinforce its commitment to transparency and the continuous improvement of its reporting model by carrying out a double materiality assessment that covers both the financial and impact perspectives, in line with the requirements of the European CSRD framework (Corporate Sustainability Reporting Directive). This work is being undertaken proactively in order to support a robust transition towards future reporting obligations.

This analysis is subject to an ongoing process of continuous improvement, and work therefore continues on the double materiality matrix, which constitutes one of the key pillars of the company's Sustainability strategy.

To conduct this assessment, we applied the following methodology:

Methodology used to identify the impacts, risks and opportunities (IROs)

A comprehensive review has been carried out to create the initial universe of IROs:

ESG Risk Rating

The ESG Risk Rating (ERR) is the basis for identifying risks. The categories are the basis for organising risks.

Benchmarking of IROs

Analysis of publicly-available materiality and sustainability risk exercises of other companies in the sector

TCFD categories

Six main transition and physical categories of the Task Force on Climate-related Financial Disclosures.

Previous reports

Review of the Sustainability Report to include prior information related to risks, materiality and opportunities.

E European Sustainability Reporting Standards

The ESRS (European Sustainability Reporting Standards) set out a list of ESG aspects for companies that has served as the basis for identifying relevant impacts.

Regulatory database

Analysis of sector-based and corporate laws and possible new regulations in the relevant countries.

Global Risk Report

The flagship publication of the World Economic Forum.

Impact assessment method

For each impact, the scope, irremediability and probability of occurrence are assessed by experts and those responsible for the Cosentino business area where the identified impact has an effect. For relevant impacts, stakeholders are consulted on the scale using a different survey or proxy methodology.

**Materiality of impact**

Scale: What is the severity of the negative or positive impact on people or the environment

Scope: How widespread are the negative or positive impacts

Irreversible nature:
To what extent could negative impacts be remediated

Probability (for potential impacts):
How likely is the impact, how frequently could it occur

Methodology for assessing financial materiality

Based on the risk tolerance analysis carried out by experts, the ranges for acceptable risk for Cosentino are established according to the main operational and performance indicators, as well as average sector KPIs. The proposed impact scale is calibrated on the basis of working sessions held with the Finance, Internal Audit, Strategy and ESG areas, ensuring a cross-cutting overview of the organisation and the company's strategic challenges. Once the scales have been defined, a survey is conducted among the owners of the areas affected by the identified risks and opportunities, with the aim of assessing their magnitude and likelihood.

Financial Materiality

The risks or opportunities generated that affect or may affect cash flows, development performance, position, cost of capital or access to financing in the short, medium or long term, but that are not captured by financial information.

- **Probability** of the occurrence of the event related to ESG issues
- **Magnitude** of the possible financial effects

Data consolidation methodology

The risk and/or opportunity assessments are collected from each of the stakeholder groups and company executives. collected. The responses from each member of the same stakeholder group, or from the same group of risk owners, carry the same weight. The average of the responses is calculated, and the corresponding formulas are applied to determine Impact Materiality and Financial Materiality.

MATERIAL MATTERS

1. *ESRS E5. Resource use and circular economy*
2. **ESRS G1. Business conduct**
3. *ESRS S1. Own workforce*
4. *ESRS E3. Water and marine resources*
5. *ESRS S4. Consumers and end-users*
6. *ESRS S2. Workers in the value chain*
7. *ESRS E1. Climate change*
8. *ESRS E2. Pollution*
9. *ESRS S3. Affected communities*

CLASSIFICATION OF MATERIAL MATTERS BY ESG PILLAR:

E-nvironmental

- 1.** Use of natural raw materials
- 2.** Products with recycled content
- 4.** Climate change mitigation and reduction of CO₂ emissions
- 5.** Energy consumption and associated costs
- 6.** Water consumption
- 9.** Air pollution
- 11.** Waste generation and associated costs

S-ocial

- 3.** Own workforce – Health and safety
- 7.** Own workforce – Training and skills development
- 8.** Own workforce – Working conditions
- 10.** Diversity on the Board of Directors
- 12.** Social, educational and cultural action programmes
- 15.** Workers in the value chain – Health and safety

G-overnance

- 13.** New regulatory measures on tariffs and dumping
- 14.** Supply chain resilience

ESG

(E) COSENTINO X ENVIRONMENTAL

COMMITTED TO THE ENVIRONMENT
THROUGH PRODUCTIVE EFFICIENCY AND
PROMOTING THE CIRCULAR ECONOMY.

We care for our common home: our planet.

Our brands enrich people's lives by transforming the spaces where they live. Cosentino is striving for increasingly sustainable products, with higher percentages of recycled material and a long useful life, by manufacturing with electrical energy from renewable sources and 99% recycled water in its production process.

Our investments are analysed under the criteria of energy efficiency, recyclability, durability and ease of dismantling, focusing on additional installations that have a direct impact on the reduction of energy and thermal consumption.

In Cosentino, we harness every resource and we are committed to waste valorisation, creating sustainable links and building innovative infrastructures. A clear example of this is our PV plant for own consumption, a benchmark in Spain, and its expansion, as well as our waste treatment plant and a regeneration station that reuses waste from the municipalities surrounding Cantoria (Almeria), where Cosentino's main factory is located. Combined with the recirculation system which enables the reuse of water from the production process, 99% recycled water is consumed at Cosentino Cantoria's production facilities.

We also foster partnerships with suppliers, scientific institutions and NGOs to preserve biodiversity by making our forests more resilient to climate change and protecting marine ecosystems.

We go the extra mile to build a better future for everyone.

COSENTINO CO₂NCIOUS: WE HAVE BEEN MEASURING OUR FOOTPRINT SINCE 2018.

We are conscious of the need for change in order to care for the planet, which is why we calculate, reduce and offset our carbon footprint.

In 2018 we measured our organizational carbon footprint for the first time, establishing that year as the baseline year, i.e. as a benchmark for the future. This calculation resulted in an indicator: tCO₂e/ t of product manufactured, which gives us a snapshot of our impact and serves as a starting point to act accordingly. The aforementioned action plan is a series of scheduled measures that, once achieved, will enable us to achieve a 35% reduction in emissions by 2030, in relative terms: tCO₂e/tonne of product manufactured.

In 2025, the addition of a new brand to our family has been a major turning point, generating constant challenges and opportunities for improvement.

This fact, together with the increase in production resulting from the new Dekton line, has led to a slight increase in the carbon footprint ratio, which will be detailed in the following sections.

Through the integration of processes, adoption of best practices and continuous pursuit of innovation, we have reinforced our commitment to decarbonization and responsible production, aligning our operations with the most stringent environmental standards.

Lastly, in 2025, the company has maintained its commitment to climate neutrality in its products: Dekton® and the Silestone® Sunlit Days series offset the emissions associated with their entire life cycle. We are currently in the process of verifying this matter.

A breakdown of 2025 emissions is shown below.

Carbon footprint calculation*

	Tonnes
Direct (Scope 1) Emissions	112,852.63
Indirect (Scope 2) Emissions	6,168.85
Indirect (Scope 3) Transport Emissions	122,952.52
Indirect Emissions from Goods and Services (Scope 3)	269,324.68
Indirect Emissions from Product Usage (Scope 3)	23,660.56
TOTAL FOOTPRINT	534,959.23

Distribution of footprint scopes

* Cosentino, S.A. also submits its Carbon Footprint to a subsequent verification process by an independent third party, in accordance with ISO 14064-1:2019 and ISO 14064-3:2019 standards.

HOW DO WE DO IT?

Climate change is a fact, so it is therefore crucial that we take steps to reduce its effects or adapt to the inevitable impacts. The carbon footprint allows us to quantify our greenhouse gas emissions, reduce them and make decisions. These initiatives contribute to limiting global temperature rises to less than 1.5°C, as established in the Paris Agreement.

WE PREVENT

Our commitment is steadfast: since 2014, four years before we first calculated our carbon footprint, we have been using electricity with a renewable Guarantee of Origin (GoO) at our Cantoria HQ. This has also been achieved in Brazil since 2017. This means that in 2025 we avoided the release of 54,955 tonnes of CO₂ emissions (Scope 2) into the atmosphere.

WE MEASURE

For yet another year, we calculated and externally verified our organisational carbon footprint, as we have done since 2018, the baseline year of the calculation. In 2025, we implemented a digital tool that allows us to monitor emissions associated with the company's three main emission sources: energy consumption (natural gas and diesel), logistics, and the consumption and transportation of raw materials. This enables us to track the progress of our carbon footprint and to anticipate decision-making aimed at reducing the overall result at year-end.

WE ACT

Once the annual carbon footprint calculation has been carried out, we review the reduction steps and those steps still to be taken, in order to monitor compliance, the remaining measures required to meet the target and the steps to be taken to achieve them.

WE CONTRIBUTE

Once we have determined our emissions and established reduction steps, we offset emissions that we are unable to eliminate for the time being. This is what we do year after year with those associated with the life cycle of Dekton® and the Silestone Sunlit Days®.

534,959.23 TCO2E

TOTAL OCF 2025

Scope 1	Scope 2	Scope 3
21.10%	1.15%	77.75%
Direct emissions from sources controlled by the organisation	Indirect emissions from purchased electricity consumed	Indirect emissions from the entire value chain, from extraction of raw materials to the end of the product's useful life

BEYOND GHGS

At Cosentino, we are committed to caring for the environment, managing our emissions not only of greenhouse gases, but also of other pollutants. We comply with our Integrated Environmental Authorisation (AAI) and follow a process of ongoing improvement defined by the company.

WE REDUCE

-7.5%

Carbon footprint reduction
vs. 2018

-35%

Voluntary target emission
reduction ratio in 2030

We are working to reduce our emissions intensity by 35% for 2030.

We are continuing to ensure that the OCF remains the backbone of decision-making in areas that impact the company's environmental component, as all areas, to a greater or lesser extent, have a direct impact thereon.

This year, with the commissioning of Dekton Line 4 and the launch of a new product, relative emissions compared to 2024 increased by 2.3%, measured in tCO₂e per tonne of product manufactured.

This represents a reduction of -7.5% on 2018.

COMMITMENT TO IMPROVEMENT

With a view to improving our environmental performance, in 2021 we joined a voluntary reporting platform, the Carbon Disclosure Project (CDP), a non-profit organisation that rates companies according to their decarbonisation strategy and ESG policy via the transparent disclosure of the company's strategy. For 2024 (last available year on the platform), a B rating has been obtained for climate change, maintaining this rating with respect to the previous year. This brings to four the number of reporting years.

WE ACT IN KEY AREAS OF THE COMPANY TO CURB GLOBAL WARMING.

78%

78% of our carbon footprint is due to indirect emissions

We involve our entire value chain, from extraction of raw materials to the end of the product's useful life.

HOW DO WE DO IT?

Raw materials: we continue to focus on recycled raw materials or those with a low carbon footprint, which are becoming increasingly important in the overall mix of raw materials used to manufacture our products. We focus not only on the recycled raw materials of today, but also on those of the future. Proof of this is the CT Quarry project (2024-2030), which has obtained European funding through the Innovation Fund programme and consists of using Silestone® waste as the basis for producing new raw materials that will replace a large part of the virgin raw materials that we currently consume.

Clean energy and energy efficiency: In 2025 the Energy Efficiency Committee adopted 16 measures that represent savings of 0.97 GWh/year.

MOST NOTEWORTHY ENERGY EFFICIENCY PROJECTS:

- Disconnection of idle consumption
- Centralisation of refrigeration equipment
- Automatic shutdown timer
- Lighting time adjustments
- Enabling automatic control
- Temperature setting
- Optimising compressed air pressure

Recertification of ISO 50001 Energy Management standard.

EFFICIENCY

SOURCES OF ELECTRICITY

100% OF THE ELECTRICAL ENERGY AT OUR PRODUCTION CENTRES AT CANTORIA (SPAIN) AND BRAZIL IS FROM RENEWABLE SOURCES CERTIFIED WITH A GUARANTEE OF ORIGIN (GOO).

The consumption of energy for total production at Cosentino in 2025 was 29% electricity and 71% thermal (natural gas), continuing with the usual trend in recent years.

But we want to take this a step further

Our solar farm and its extension on the warehouse roofs total between them 35 MWp of installed power and more than 60,000 panels, supplying 26% of our electricity consumption in the Cantoria industrial complex in 2025. This remains an industrial milestone with regard to PV own consumption.

There is also a plan to provide the rest of the Group's infrastructures with certified renewable energy contracts and self-consumption photovoltaic installations wherever feasible.

Electric Energy Self-Consumption %

Photovoltaic installation at the Cosentino factory (Cantoria, Almería)

EFFICIENCY

WATER CYCLE AT COSENTINO:
AN INFINITE LIFE

99%

Recycled-source
treated water

Our technological capacity allows us to recycle and recirculate water, time and time and again.

We work hard to protect the water we consume, well aware of its scarcity and every living being’s need for water. This is brought sharply into focus by the location of our production facilities in the southeast of Spain, one of the areas with the least rainfall on mainland Spain.

To achieve this, the best technologies are available at our nine water treatment plants at the industrial complex in Cantoria. Thanks to these technologies, we are able to recirculate more than 75,000 m3 per day, equivalent to the daily irrigation of 1,400 football pitches.

Since 2023 we have had our very own waste water treatment station, enabling us to give the waste water produced by the nearby villages of Olula del Rio, Macael and Fines a second life. In this way, we can close the circle and reduce the consumption of water from natural sources, increasing water availability in the region and boosting circularity.

Use of water captured (m³)	2023	2024	2025
Irrigation (m)	80,057	76,227	62,394
Industrial (m)	351,703	395,682	402,176
Total (m)	431,760	471,909	464,570

Change in water capture at Latina, Brazil (m³)

Industrial (m³)	10,161	8,771	6,534

EFFICIENCY

EVERY KILO OF RAW MATERIAL
IS IMPORTANT; RESOURCES ARE
FINITE.

Our production teams constantly strive to get the most out of every kilogram of raw material used in our production process. Efficiency is one of our main goals, as we see waste as an opportunity.

Our most-used raw materials at the Cantoria factories include feldspar, cristobalite, glass, clays and kaolin, among others.

Natural stone is mainly consumed at the factory in Brazil, 53% of which is quartzite and 47% granite.

Although there is still some way to go, the know-how obtained and the continuous learning path is enabling us to improve the efficient use of raw materials.

669,674 tn

of raw materials used in Cantoria

29,109 tn

of raw materials used in Brazil

CIRCULAR ECONOMY AND WASTE VALORISATION

We promote the use of recycled materials and the reduction of waste in our processes, fostering their valorisation and responsible consumption in our value chain.

Cosentino remains firmly committed to the circular economy. We continue to allocate resources and effort so that, year after year, Cosentino's range of colours and products reflect the circular economy and waste valorisation, by offering materials that are produced with a high recycled and/or recovered raw material content.

CIRCULAR ECONOMY

ESTRATEGIA CIRCULARITY

We innovate to create new opportunities for every kind of waste and for everybody's future.

We believe that today's waste will be tomorrow's resources, so we are working to ensure that waste can be valorised as new raw materials in different applications, both internally and externally. Our aim is to convert this waste into new materials that meet the technical, economic and health and safety requirements of the different manufacturing processes or applications. In recent years, these new materials originating from our waste have performed satisfactorily in different practical cases as a filler and stabilisation component for roads and pathways, in concrete and mortar products, in ceramic bricks or as a substrate for plants and drainage material, among others. Cosentino also leads or participates in different research projects for the development of innovative solutions that allow our industrial waste to be made use of, as well as our products at the end of their useful lives.

In 2025 we were able to valorise 17.17% of all waste generated from the production process at Cantoria (Almería, Spain) and Latina Vitória. Thanks to our Circular Economy strategy and the various projects under way, we aim to improve our waste valorisation capabilities over the coming years.

We have our own waste treatment and valorisation plant (CoMA): the Cosentino circular development centre.

The commissioning of our own Waste Management and Valorisation Plant for the treatment and valorisation of waste generated by our production processes -which also leads to a reduction in the environmental impact caused by transportation-, marked a milestone in our Circular Economy Strategy in 2018.

Since 2024, after consolidating our commitment to managing our own waste, we began expanding our waste-management facilities. Our objective is to have the necessary infrastructure in place to ensure the temporary storage and subsequent treatment of the waste generated, classifying it based on its quality and characteristics to determine its future application across different valorisation lines.

All the efforts made, both in improving production processes and in R&D investment focused on the use of new materials, have enabled us to achieve a combined share of 11.51% recycled-origin raw materials in the production of Dekton® and Silestone®, relative to the total consumption of all raw materials.

Cosentino's waste management plant (CoMA).

CIRCULAR ECONOMY

Our new products aim to be more responsible by the inclusion of recycled material in their content

All our efforts to enhance production processes, together with R&D investment in the use of new materials, have resulted in Dekton® production containing 8.8% of raw materials derived from the valorisation of our own waste, while 13.4% of raw materials used for Silestone® production are pre-consumer recycled raw materials.

In 2025, recycled raw materials used in the manufacture of Silestone® and Dekton® accounted for 11.5% of total raw material consumption.

SILESTONE®

Thanks to Hybriq+ technology, all colours and series with a pre-consumer recycled content of more than 20% can be identified.

DEKTON®

At Dekton®, we continue placing major emphasis on ensuring that all residues and waste generated in the production process can be used again as recycled raw material.

Since its inception, Dekton® has recovered excess material generated during the pre-furnace production phases. This material is reintegrated as raw material in certain product formulations, as it retains all of the properties and features inherent to authorised raw materials. It can therefore be affirmed that, in itself and by design, the Dekton® production process has been aligned, since inception, with the principles of circular economy.

Consumption of recycled raw materials (%)

We are investing in the world that we want to bring about, allocating our resources, energy, innovation, initiative and talent.

ESG

(S) COSENTINO X SOCIAL

Our sustainability goals encompass themes ranging from the management of human rights and inclusion to the personal relationships that are forged in the working environment.

TEAM

Our priority is to promote and enhance safe and healthy working environments that foster personal and professional growth.

People as a priority

It is people who create real value for our customers. Our business is sustained and grows through the contributions of our employees in innovation, safety, sustainability, and growth, directly impacting customer satisfaction. Our team is, by vocation and conviction, the key link in our value proposition as a business project.

Focused on the well-being of our employees

In this regard, we are committed to providing a safe, healthy, motivating and positive working environment. Promoting the professional and personal development of everyone on our team.

We are committed to their satisfaction

To this end we provide communication channels and continuous feedback. This makes sure it is our employees who guide us and lead the way in promoting the best possible working environment. We consistently promote initiatives that benefit the group rather than the individual. Satisfied people contribute more and perform better.

Optimum working conditions

We put our employees first, creating working conditions that are not only safe and healthy, but that also foster their personal development. We firmly believe that investing in the well-being of our team is akin to investing in the future of our company.

TEAM

We focus on identifying and attracting the right profiles to ensure we have the necessary skills to address the new uncertain landscape. This enables us to grow sustainably and to become a benchmark employer in the communities where we operate.

We closed 2025 with a workforce of 5,884 people worldwide, made up of professionals hailing from 84 different nationalities and with 25% of our managers being women.

Evolution of the number of employees

C·PEOPLE WELCOME, GROW, CARE

Our people strategy plays an active role across all phases of the employee lifecycle.

The sustainability strategy places the employee and their personal and professional development at the core of all decision-making. To that end, for the fifth year running, we have worked on this aspect, paying special attention to three key moments in the lives of our employees:

Welcome

Our onboarding approach focuses on the entire applicant selection process; when a potential employee first approaches Cosentino, that person is already important to us. Fully aware that first impressions last, we ensure that their experience as an applicant and as a new employee is as positive and pleasant as possible.

Grow

Growth plans and a focus on people's development are the overriding criteria during the employee lifecycle, which is why we believe that managers play a pivotal role.

Care

To ensure an employee is truly motivated and engaged, it is essential for the company to understand and support their employees' personal motivations. That is why we strive not only to foster employees' professional development and ensure fair pay, but also to support and care for employees on a human level. In addition, we promote an inclusive and flexible working environment that allows each employee to balance their work responsibilities with their personal needs, thus ensuring their overall well-being.

C-PEOPLE WELCOME

DIVERSITY

Diversity, inclusion and equity are key to our people strategy,

We are social creatures and we grow and learn through our interaction with others. At our company, the ability to accept diversity and innovation is profoundly woven into our DNA. In a constantly-changing world, it is essential to adapt, explore new opportunities, observe and learn on a continual basis.

Flexibility and openness to change are more important today than ever. The integration of emerging technologies and the fostering of an inclusive and collaborative environment enables us to address today's challenges confidently and creatively. By adopting these practices, we are not only preparing for the future, but also actively building it.

Diversity in our company not only enriches us culturally, but also drives our innovation and creativity.

Our focus on diversity is structured around five pillars: gender, age, sexual identity, socio-ethnicity and diverse abilities.

By valuing and harnessing different points of view and experiences, we build an inclusive environment where every voice counts. Together, we turn challenges into opportunities to reach new heights, strengthening our market position and achieving sustainable, shared success.

The gender strategy is enshrined in our Equality Plans. Based on diagnoses that have been carried out with and for the companies making up the Group, we have put in place measures that can guarantee our priorities regarding gender and equity.

Engagement with the various workers' representatives means that this priority will be a joint effort.

With a special focus on leadership positions and talent attraction, the strength of female talent across our organisation will set us apart in new professional environments.

PEOPLE WITH DISABILITIES 2025

	Men	Women	Overall total
<i>Spain</i>	19	4	23
<i>Brazil</i>	6	2	8
<i>France</i>	1	-	1
<i>Italy</i>	-	3	3
<i>Germany</i>	1	1	2
<i>Portugal</i>	-	1	1
Overall total	27	11	38

Cosentino also applies exceptional supplementary measures to comply with the obligation to support and integrate people with disabilities (formerly Spain's LISMI legislation), today the General Law on the Rights of People with Disabilities and their Social Inclusion (LGD per its Spanish acronym).

One such example is the arrangement of an industrial laundry service that uses special employment centres.

C-PEOPLE WELCOME

OUR EQUALITY PLANS: 8 KEY COMMITMENTS.

A live tool that improves our market positioning .

In accordance with current regulations, Cosentino implements Gender Equality Plans as key tools to enhance our awareness of equal treatment and equal opportunities between women and men. This is an absolute priority for the company, as we consider equality a fundamental principle in our relationships with all our employees and in Cosentino's people management.

These measures have enabled us to recruit and develop increasingly diverse talent, thus improving our position in the market. These live tools are now in place across all management processes (recruitment, selection, development, communication, training, etc.). Under constant renovation, they are designed in conjunction with all company departments, alongside representatives of those in charge of each plan.

The company also has a protocol for the prevention of workplace, sexual and gender-based harassment, as well as harassment due to sexual orientation and identity, which contributes to creating a working environment in which people's dignity is upheld. The protocol helps us to identify situations of this nature in order to eliminate discrimination and consistently ensure the rights of the victim. Despite efforts to prevent harassment situations arising, we also have a procedure that is followed whenever a harassment claim or complaint is filed by an employee

1. <i>Guarantee equal treatment and opportunities for women and men in terms of access, selection, recruitment, promotion, training, work-life balance, occupational health and safety, measures to combat sexual and/or gender-based harassment and gender-based violence.</i>	2. <i>Continue ensuring equal pay for work of equal value.</i>	3. <i>Apply a gender perspective across all company areas, policies and decisions.</i>
4. <i>Guarantee the absence of gender-based discrimination in terms of remuneration. Ensure that there is no gender pay gap for equal performance in the same professional category.</i>	5. <i>Foster the work-life balance of those making up the company's workforce.</i>	6. <i>Make headway in reaching a balanced presence of men and women, and address professional groups in which imbalances have been detected.</i>
7. <i>Guarantee the fundamental rights of Cosentino's staff by eradicating and sanctioning conduct that can be classified as sexual harassment and sex-based harassment in the workplace.</i>	8. <i>Safeguard the use of non-sexist and non-discriminatory language in corporate communications, both internal and external.</i>	

C·PEOPLE GROW

WE PROMOTE THE IDEAL ECOSYSTEM TO
HELP OUR EMPLOYEES GROW BOTH
PROFESSIONALLY AND PERSONALLY.

*We support continuous training
and internal mobility .*

We listen to our employees when they wish to take on new challenges and responsibilities, when they wish to evolve towards new roles. Our goal is to help them grow alongside us, consolidating their growth and ensuring they take the right steps for a long and lasting journey with us, and that the development cycle benefits both sides.

Through continuous training we ensure that they are prepared and have the necessary skills to take on newly assigned functions and responsibilities. We also encourage internal mobility and the participation in improvement projects to strengthen the quality of our workforce, in an effort to strike an optimal balance between specialisation and the multidisciplinary skills of our employees. In addition, we promote young talent development programmes to ensure our future, encouraging accelerated growth.

Through the above measures we try to make Cosentino the best possible environment for development. This helps us to take on new projects with a greater probability of success, significantly contributing to a more sustainable business model in the short, medium and long term.

C·PEOPLE GROW

AN ORGANISATION THAT GROWS BECAUSE PEOPLE LEARN

Each and every one of our employees are key to Cosentino's continuous transformation and evolution. This process is, in turn, dictated by the markets in which we operate and our customers. The company grows because the people who manage it also grow, learning every day how to make it more digital, more secure, more cybersecure, more service oriented; in short, how to make it better day by day.

This places us at the cutting edge, forever alert to rapidly adapt to the upcoming needs of the business. This is achieved thanks to our Talent Cycle, the cornerstone of which is the employee's own initiative and enterprise in terms of professional development.

At Cosentino we also strive to identify people with greater potential, crafting individual development plans for them. The aim of all the foregoing is to create a solid pool of future leaders, as the expected growth going forward means we will require talent to deal with future needs.

Employees take the initiative as to their professional training and development .

We also have succession plans in place at Cosentino for all executive positions. This is thanks to an increasingly global project that fosters geographical mobility in a bid to exchange knowledge and best practices. Our performance management process also fosters direct feedback to our employees about their performance, identifying specific improvement opportunities for everybody.

These specific training actions include tools such as individual coaching, the Learning Corner platform, continuous training via digital platforms and languages and specialised training programmes.

At the Learning & Talent Development area we coordinate all initiatives related to talent management. Together we will ensure that Cosentino is an organisation that is constantly learning.

OUR OBJECTIVES

- Consolidate continuous learning habits and knowhow sharing to make Cosentino an organisation that is constantly learning.
- Provide employees with the necessary tools - all of them of a markedly digital nature - to encourage them to take the initiative themselves as regards their professional development and growth, enabling them to better carry out their duties.
- Promote and boost internal training as a way of sharing business knowledge among our professionals, aiding in bolstering relations among our employees, creating an environment where people can work together and a corporate culture oriented towards learning and collaboration is consolidated.
- Always place the person at the core of our training and development initiatives so that the employee experience is continuously enriched and results in excellent performance.

Manual workers/Admin.	19,315
Overall total	47,849

C-PEOPLE GROW

REMUNERATION

Our remuneration takes into account internal equity, is competitive in the market and recognises extraordinary performance.

At Cosentino, we promote an organisational model geared towards excellence and aligned with the most stringent market standards. To ensure a competitive and coherent remuneration structure, we carry out a job evaluation process that classifies each role according to its level of responsibility, contribution to the business, degree of autonomy in decision-making and impact on team coordination. This analysis forms the basis of our job framework, a cornerstone that underpins all talent management policies and processes, which in 2025 has been consolidated in the Organisation.

Based on this organisational structure, we develop salary bands according to grade and level, which allows us to compare our pay position against market benchmarks and ensure internal pay equity.

In addition, our professionals have variable remuneration programmes aimed at reinforcing alignment with the company's strategic objectives. These schemes promote a culture of high performance by linking the achievement of corporate, team and individual goals with the attainment of incentives. Our goal is to foster an environment that promotes sustainable growth, professional development and the creation of shared value between the organisation and its employees.

In line with this commitment, both the annual salary review process and the achievement of variable remuneration include the assessment of individual performance, ensuring that the effort, contribution and impact of each employee is appropriately reflected in their pay progression.

C-PEOPLE GROW

REMUNERATION POLICIES

We design a global remuneration strategy based on local initiatives to ensure equity and competitiveness, reinforcing the high performance of our teams.

Against a global backdrop of constantly evolving labour markets and increasingly demanding dynamics, we at Cosentino continuously analyse remuneration trends in the different geographical areas where we operate. This exercise allows us to anticipate the need for talent, bolster our value proposition, and ensure a competitive position in all environments.

2025 was the first year in which we divided the annual variable remuneration for the Manufacturing, Logistics and Corporate families into two blocks: one linked to corporate and departmental objectives, and the other linked entirely to individual performance, promoting a culture of meritocracy and high performance. In doing this, we promote the sustainable growth and professional development of our employees.

Collaboration with the different Business Areas, which brings us closer to the reality of the different markets, allowing us to continuously monitor working condition trends in those markets and propose improvements to our compensation approach.

In 2025, we broadened our benefits package for our employees in Spain by enhancing life insurance coverage, incorporating vehicle leasing options and expanding financial guidance services.

One of the main developments was in the area of flexible remuneration. A card has been included that integrates flexible meal and transport remuneration, which works on demand rather than blocking amounts available for employees in advance. Implementing this has improved functionality and regulatory compliance.

Internationally, we have increased the scope of coverage provided by our international health and life insurance broker, incorporating countries where we have the strongest presence. In doing so, we have improved our visibility of market practices and gained efficiency in negotiations and day-to-day management.

Finally, in the Americas, we have switched the broker that manages our main profits in the United States and Canada, moving to a boutique solution with a much more customised and efficient offering.

C-PEOPLE GROW

FAIR AND COMPETITIVE REMUNERATION

Cosentino’s remuneration policy fosters diversity and inclusion and benefits performance and added value.

Our remuneration policy is fair, defined based on level of responsibility, and competitive in the markets in which we operate, and aims to always recognise individual contribution to our results.

We foster recurring country-level audits to ensure this internal equity is strengthened year on year, thereby reducing any gender or other pay gaps that may exist.

Our annual salary increase management cycle ensures not only alignment with market conditions, but also objective recognition of individual merit, preserving equal opportunities regardless of gender or other personal characteristics.

EXECUTIVE SALARY DATA

	% gender		Average in Euros	
	Men	Women	Men	Women
2025	95%	5%	315,670	**
2024	95%	5%	345,882	**
2023	95%	5%	330,753	**
2022	95%	5%	319,895	**

**This analysis uses theoretical annual remuneration, not affected by the degree of compliance with company targets, unlike the data provided in the annual accounts, which reflects the actual remuneration paid.*

*** Information regarding the average salary of female executives and the corresponding pay gap is not presented for reasons of confidentiality, given that there are less than three women at this level. In accordance with good reporting practices and to protect individual identification, this data is omitted.*

Salary data, excluding executives

Average remuneration	2022 (€)	2023 (€)	2024 (€)	2025 (€)	Change in the period (%) 2024-2025
Male	42,752	44,680	45,513	45,834	0.71%
Female	51,263	53,855	54,338	54,867	0.97%

Average remuneration	2022 (€)	2023 (€)	2024 (€)	2025 (€)	Change in the period (%) 2024-2025
Under 25	29,731	29,796	27,956	28,669	2.55%
25 to 35	39,720	40,700	40,664	40,955	0.71%
35 to 45	47,579	49,222	50,361	50,667	0.61%
45 to 55	50,476	52,036	52,814	52,588	-0.43%
Over 55	50,916	53,950	53,802	55,074	2.36%

Average remuneration	2022 (€)	2023 (€)	2024 (€)	2025 (€)	Change in the period (%) 2024-2025
Management	161,141	166,506	171,617	173,795	1.27%
Supervisors	73,133	76,916	74,896	77,905	4.02%
Skilled professionals	53,052	54,974	55,919	56,644	1.30%
Admin.	38,588	39,781	40,226	41,471	3.09%
Factory workers	27,983	28,697	28,750	29,091	1.19%

Below is a table showing the gender pay gap by category in 2025:

Pay gap	
Senior management	--
Management	10.95%
Supervisors	-17.60%
Skilled professionals	-19.32%
Admin.	-4.58%
Factory workers	0.00%
Overall total	-29.25%

* Pay gap by professional category (average):
 $(\text{Mean for Men} - \text{Mean for Women}) / (\text{Mean for Men})$

Where, a positive gap (+) indicates the % by which the mean salary of women is lower than the mean salary of men and a negative gap (-) indicates the % by which the mean salary of women is higher than the mean salary of men.

** Information regarding the average salary of female executives and the corresponding pay gap is not presented for reasons of confidentiality, given that there are less than three women at this level. In accordance with good reporting practices and to protect individual identification, this data is omitted.

CULTURE AND DNA

*Dreamers, Humans, Committed and Courageous,
these are our hallmarks.*

It is these values that Cosentino employees demonstrate on a day-to-day basis, not only in the workplace, but also in all the initiatives that have been launched in 2025.

SAFETY AND WELL-BEING

Health & Safety month continues to be a critical date in our calendar. As in previous years, April has become the key month when we carry out specific campaigns, awareness-raising activities and training programmes, together with our main suppliers, in order to keep all our teams focused.

The roll-out of Ruta 0, as a cross-cutting programme that establishes quality, effectiveness and safety as priorities, has helped us to set up a recognition programme for those employees who have excelled in terms of safety. This programme, launched at the Cantoria industrial plants, will soon be implemented at the rest of the factories.

Once again, the Cosentino Wellness Crew sports proposals have been running, cycling, chess, with the involvement of athletes in the main competitions in which Cosentino competes.

HEALTHY EATING

Healthy eating is essential for people's overall well-being. Through agreements with local entities, Cosentino seeks to adopt balanced and conscious eating habits that not only improve physical health, but also have a positive impact on mental and emotional health.

We promote healthy eating through various initiatives, such as subsidising healthy menus, using local suppliers to provide balanced and accessible nutritional options. Encouraging healthy eating helps to increase energy, improve concentration and reduce the risk of illness, creating a more productive and satisfying work environment for all.

WORK-LIFE BALANCE

Work-life balance is a fundamental pillar of our business philosophy. We understand that work-life balance is essential to the well-being of our employees and, therefore, to the success of the company. We have therefore implemented various measures to make this balance easier. From the launch and consolidation of employee bus routes, which not only reduces the stress of daily commuting but also promotes sustainability, to workplace visits, which enable families to get to know their loved ones' place of work.

In addition, we organise events such as Family Days, where employees can enjoy a relaxed and fun day of activities with their families. During holiday periods, we offer work-life balance camps that provide a safe and entertaining space for our employees' children, allowing parents to work with the peace of mind that their children are being well looked after. These initiatives reflect our commitment to the holistic well-being of our employees, creating a work environment that values and supports family life.

DIGITAL DOWNTIME

Digital downtime is a fundamental labour right for all Cosentino employees. This right ensures that workers can enjoy their downtime, leave and holidays without having to be on digital devices outside working hours. Digitalisation and new technologies are allowing people linked to Cosentino to achieve these moments of downtime.

Therefore, through the implementation of its remote working policy, Cosentino ensures the protection of the right to digital disconnection, regardless of whether work is carried out on-site or under a remote working arrangement. This policy is currently approved and has been in force since September 2024 for employees in Spain.

TEAM

HEALTH AND SAFETY

Taking better care of ourselves today in order to take care of the future.

At Cosentino we put people first, which means we look after their health and safety above all else, through better infrastructure, processes, greater training, continuous monitoring and constant dialogue among all players.

For years we have relied on the five basic principles as the cornerstones on which our preventive culture is based. Namely:

- 1. embedding of energies in work teams (LOTO)*
- 2. compulsory use of personal protective equipment*
- 3. safe handling and storage of slabs*
- 4. safe handling of forklifts*
- 5. all incidents and accidents are reported*

WE IDENTIFY THE RISKS AND ASSESS THEM TO DEFINE AREAS FOR IMPROVEMENT.

The risk assessment process is dynamic and feeds off reported incidents, accidents, changes made to jobs and equipment.

In this regard, we implement supervision and employee participation processes and coordinate communication tools, such as videos, posters and good practice handbooks, which are then distributed among the team and customers.

We control critical risks by promoting the use and visibility of the work access permit by all stakeholders. Information on the tasks carried out by contractors under a work permit at any given factory is published on a “permits” notice board, which is located at the production plant entrance.

We also measure the maturity of our contractors’ “preventive culture” through a monthly assessment of supplier health and safety indicators. Regular meetings also enable us to draw up specific action plans and remain in constant communication with them to improve the health and safety of operations. Below are some of the initiatives carried out with our contractors in 2025:

- Implementation of the Ruta Zero project.
- Training in Gensuite, the prevention management platform.
- Compliance audits on the use of PPE (personal protective equipment).
- Training pills and monthly safety inspections with cleaning companies.
- Assessment and analysis of monthly contractor accident rates

WE ARE COMMITTED TO THE HEALTH AND SAFETY OF ALL WORKERS WHO ARE INVOLVED IN OUR PRODUCTION PROCESSES.

In 2025, the Ruta Zero project launched in 2024 continued. Through this initiative, safety has been strengthened across all levels of the management chain, with a focus on the establishment of procedures, the analysis of RPNs, and training. Emphasis has also been placed on increasing the visibility of all incidents, on action reporting, and on positive recognition. As part of this project, contractors operating within our industrial park have been directly involved.

During 2025, the investment plans initiated in previous years were continued, reaching an amount of more than €1 million, specifically allocated to the health and safety area. These investments were mainly aimed at improving working conditions related to exposure to chemical products and at controlling thermal stress.

The following pages detail these indicators, as well as the proactive actions carried out to reduce risks, such as improvements in incident reporting, the plan to minimize critical risks (including the addition of safety measures on machinery, among others), and the project for the prevention of entrapments and falls from height.

OUR STRATEGIC HEALTH & SAFETY PROJECTS REFLECT OUR COMMITMENT TO PROTECT OUR PEOPLE.

RUTA ZERO PROJECT

The aim of the Ruta 0 project is to develop a Cosentino model of industrial excellence that will make us a benchmark in safety, efficiency and quality, with standards that facilitate the Group's industrial internationalisation. It is based on three benchmark models: safety, maintenance and quality and the waste model, the first of which is the subject of this section.

The development of a safety model aims to create safe working environments for our employees and contractors with the goal of a zero accident rate.

The "Zero Accident" methodology in industry focuses on preventing and fully eliminating occupational incidents and injuries. This approach involves implementing proactive measures, such as team training, regular audits, monitoring the proper use of protective equipment and promoting a culture of safety. The active participation of all workers, together with the identification and mitigation of risks, are key components in achieving the goal of zero accidents, thus creating a safer and healthier working environment.

TRAINING AND PROCEDURES

Training plays a crucial role in this methodology. Workers are taught about safe practices, using the operating procedures developed (safety standards) and the proper use of personal protective equipment. Safety awareness and competence are promoted, ensuring that each member of staff is fully equipped to deal with the risks associated with their work tasks.

IDENTIFICATION AND ASSESSMENT OF RISKS

Identifying and assessing risks is a key process to achieving the goal of "Zero Accidents". This involves conducting regular risk assessments, both at macro and micro level, to identify potential hazards in day-to-day work processes. The focus will be on the most significant risks and action will be taken to reduce the level of risk by implementing the proposed preventive and corrective measures, ensuring effective mitigation of the identified risks.

ONGOING MONITORING

Monitoring of the various defined activity indicators is ongoing via the preparation and weekly updating of control panels. These differentiate the progress for the lines of action deployed: involvement of operators, training, creation of standards, risk reduction, implementation of the project in contractor companies and AERIS security to measure the control of the risk associated with RCS exposure.

AERIS PROJECT

As part of our commitment to health and safety, 2025 saw the continuation of the AERIS project, the goal of which is to reduce the risk of exposure to inhalation of respirable crystalline silica. AERIS is the company's most important package of investments in health and safety.

This year we have concentrated efforts on collective, process and task definition improvements.

PLAN TO PREVENT FALLS

Identifying and resolving critical safety points for Production and Maintenance tasks (entrapment in machinery and falls from height) in the silos at the Silestone factories. This is an ongoing plan that is not confined to taking a snapshot of a situation on any particular day.

GLOBAL ACTION PLAN FOR THE PREVENTION OF FIRES AND EXPLOSIONS

In order to improve safety and the management of production processes, the Cosentino Group has devised an Action Plan that includes a series of activities and investments aimed at preventing fires and explosions, improving process safety and reducing potential risks. The most ambitious programme is the installation, mounting and operation of the new RTOs (Regenerative Thermal Oxidizers).

The PAU (Self-Protection Plan) has been updated and a new DOPEX document has been drawn up which analyses the areas of particular danger in the event of fire.

EQUIPMENT SAFETY IMPROVEMENT PLAN

We have drawn up a machinery improvement programme that goes above and beyond regulatory compliance. It is aimed at avoiding risks stemming from machinery manipulation and operation.

During 2025, as a key highlight, internal audits and equipment checklists were carried out, and all identified deficiencies were corrected as quickly as possible.

CONTINUED ENHANCEMENT OF OUR SAFETY CULTURE.

We are continuing to work together to reduce our overall accident rates by taking tangible measures and driving forward specific plans to achieve this strategic objective.

ACCIDENT RATE BY GENDER IN COSENTINO SPAIN

	Men	Women
Number of occupational accidents	32	8
Frequency rate	7.44	5.58
Severity rate	0.26	0.26
No. of occupational illnesses identified	4	0
	32	8

The **frequency rate** (number of accidents / number of hours worked × 1,000,000) achieved is 6.97, and the severity rate (number of workdays lost due to accidents resulting in sick leave / number of hours worked × 1,000) is 0.50.

COSENTINO GLOBAL

Accident rates follow the U.S. OSHA reporting criteria, which distinguish between the **TCIR** (number of recordable accidents per 200,000 hours worked) and the **SR** (number of lost workdays per 200,000 hours worked).

Under Spanish criteria, the indicators used are the **IF** (frequency index) and the **IG** (severity index). The IF represents the number of accidents resulting in sick leave per one million hours worked, and the IG represents the total number of lost workdays (including commuting accidents) per 1,000 hours worked.

Región	TCIR	SR	IF	IG
Cantoria	2.93	100.3	6.97	0.50
Spain	2.89	0	0	0
Europe	1.54	55.8	5.78	0.28
USA	3.35	101.3	6.87	0.51
Latina	1.50	0	0	0
APAC	0	0	0	0
ROW	1.46	8470	7.28	43.70
Global Cosentino	2.72	197.1	6	0.99

During 2025, it is worth highlighting that the total number of accidents resulting in sick leave was reduced by 38%.

The absenteeism rate reflects the total number of hours of non-attendance or absence from effective work compared to the total number of theoretically scheduled working hours.

ABSENTEEISM RATES DURING FISCAL YEAR 2025*.

Country	Absenteeism	Absenteeism hours
Spain	7.3%	476,534.65
USA**	1.5%	34,296
Canada*	7.6%	18,064
France	6.1%	11,840
Italy	4.0%	7,272
Australia	2.3%	3,584
Germany	8.0%	8,560
Portugal	3.2%	2,520
Poland	5.7%	4,320
Sweden	3.3%	2,328
ROW	1.7%	23,218

* Results are provided for the countries with data integrated into the corporate information system. This year, we have improved the process of centralizing absence-related information, which has enabled us to expand the group of countries for which absenteeism details are reported and to increase the accuracy of the information.

** In the case of the United States and Canada, only absenteeism hours related to long-term absences have been collected.

(S) COSENTINO X SOCIAL

COMMUNITY

We promote initiatives that encourage collaboration and dialogue with our community and partners.

We drive initiatives that contribute to the development of the communities in which we operate; that is the power of our surfaces in every space and in every home.

SOCIAL ACTION POLICY

COMMITTED TO MAXIMISING OUR CONTRIBUTION TO SOCIETY.

Our vision of global leadership goes beyond being merely present in many regions; instead it is based on a profound commitment to each one of them. For this reason, we are actively involved in the economic, social, educational and cultural development of the communities in which we operate.

We strive to create opportunities for growth, promote education and support cultural initiatives that enrich people's lives. Furthermore, we work in close collaboration with local leaders and organisations to ensure that our actions have a positive and lasting impact.

We believe in the importance of contributing to improving quality of life, supporting the communities with which we interact. Our relationship with them goes beyond a purely business interaction; at Cosentino, we assume the responsibility of generating well-being among the region's inhabitants, an objective that we pursue on the basis of the four policy areas described below.

COSENTINO
care

+0.96M€

Amount of Spanish
donations

FOR SOCIETY

Architecture, Design & Society: thanks to our product and experience, we help to build spaces that are designed to improve social well-being.

FOR CULTURE

Education & Culture: we provide opportunities for professional and personal training and development

FOR THE PLANET

Biodiversity & Natural Spaces: we contribute to the reduction, mitigation and even reversal of the damage caused to natural areas to restore them, as far as possible, to their original state

FOR HEALTH

Health & Well-being: we promote healthy lifestyle habits among our teams and all other stakeholders.

Third Social Action Competition.

We launched the third Social Action Competition in which Cosentino offers economic or in-kind support to reward charitable initiatives altruistically undertaken by its employees for the benefit of society. These initiatives are aligned with the pillars of the social action policy in the regions in which we operate. All employees have the opportunity to propose and vote for their favourite projects. The winning companies will be selected and will receive their awards over the course of 2026.

The main objective of the "Empresa Solidaria" seal is to recognise companies that seek to create a positive impact on society by marking the solidarity box in their corporate income tax return. Cosentino was awarded the certification by Plataforma Tercer Sector (Third Sector Platform) in recognition of its profound social commitment. This commitment is demonstrated by its contribution to the financing of projects that not only guarantee citizens' rights, but also fight tirelessly against poverty, social exclusion and inequality. With this seal, we reaffirm our dedication to building a fairer and more equitable future for all.

EDUCATION & CULTURE

WE INVEST IN EDUCATION AND CULTURE, FORCES THAT TRANSFORM COMMUNITIES.

Driving knowledge.

At Cosentino, we firmly believe that investing in quality education for our young people means investing in a future filled with opportunities. Consequently, we are continuing to invest in education and training via the Eduarda Justo Foundation and the Dual Vocational Training Programme offered at our Cantoria headquarters.

We are also convinced that culture transforms the communities in which we operate, which is why we support art in the province of Almería through the Ibañez Cosentino Foundation.

EDUARDA JUSTO FOUNDATION

Training tomorrow's leaders today.

Since its creation in 2006, the Eduarda Justo Foundation has been working to boost Cosentino's immediate social environment. To this end, its mission is to foster leadership and educational, social and business development in Almería, Andalusia and Spain. The foundation also focuses on promoting the development of talent, values (effort, passion, humility, purpose, non-conformism, global vision, idealism, perseverance, etc.) and on the desire for the continuous development of young people who have the potential to become a generation that is ready to lead the world of the future (paying special attention to people with limited economic resources).

Leaders of the Future Seminar: inspiring young professionals to lead change.

This intensive specialist leadership training seminar aims to identify, train and advise more than 120 professional young people with great potential, primarily from Almería, helping them to become our society's future social, economic and business role models.

2025 Leaders of the Future Seminar

Cosentino's headquarters in Cantoria, Almería, became the meeting point from 11 to 13 September for 120 young professionals, entrepreneurs and students from across Spain. During these three days, participants lived together full-time, attending sessions, conferences and workshops, and sharing accommodation, with the aim of fostering strong connections among them.

The programme was provided at no cost to participants, as it was co-funded by the Foundation together with the Regional Ministry of Universities, Research and Innovation of the Regional Government of Andalusia. All materials provided, accommodation and meals were fully covered by the scholarship.

As every year since 2008, the Eduarda Justo Foundation organised the Future Leaders Seminar, which has become a benchmark initiative for promoting leadership in Spain. This year's edition featured speakers such as Afghan journalist and refugee in Spain Khadija Amin, Spanish blogger Enrique Dans, adventurer Nacho Dean – the first Spaniard to walk around the world and the first person to swim across the five continents – and Ana Molina, CEO of Odders Lab, the world's third-largest virtual reality gaming company.

Over its 18 editions, the seminar has welcomed 1,750 participants. These young people, aged between 17 and 35, came mainly from the province of Almería (72%), as well as from other parts of Andalusia (20%) and the rest of Spain (8%).

Eduarda Justo Scholarships: International scholarships for young people with talent and the will to lead the future.

UNITED WORLD COLLEGES SCHOLARSHIPS

This programme aims to “train the leaders that will transform the world”. With this in mind, we offered scholarships to three high-potential young pre-university students from Almería to undertake a two-year International Baccalaureate programme within the United World Colleges (UWC) network. We sought out committed and inquisitive individuals with initiative, determination and ambition to reach their full potential and become local and global leaders.

The mission of United World Colleges is to promote a peaceful society through education in diversity and multiculturalism. UWC has 18 schools across four continents, where young people of over 100 nationalities study, all selected and awarded scholarships in their home countries on the basis of personal merit alone - setting aside their socio-economic status, political beliefs, religion, etc.

These schools offer a comprehensive education that combines academic excellence, creative and artistic activities and sports with service to the community in which each school is located.

This year we awarded a scholarship to Carmen Raymond Segura who will study at UWC USA; to David Paredes Gil, who will study at UWC Robert Bosch in Germany and to Marco Jesús Pérez Alférez who will study at UWC Mostar (Bosnia-Herzegovina).

In addition to these scholarships, we awarded five grants for the 15-day ActionxChange summer camp, focused on the development of social projects, to Silvia Domínguez Cotes, Iker Gamaza Varela, Maryam Guerrab Batal, Lucas Pinart Benavides and Álvaro Solana Díaz.

CANADA TECH SCHOLARSHIPS

Each year, we look for four inquisitive young people, who stand out from the rest on account of their curiosity and passion for science and technology, their undertaking of scientific, technological or business projects and their eagerness to realise their full potential in a globalised world, and we offer them two-year scholarships in a dual programme.

- *The first year covers one academic year, equivalent to the first year of the baccalaureate, in a Canadian school.*
- *In the second year, they are offered a training programme in leadership, technology and business creation to supplement their second-year baccalaureate studies at their school of origin.*

The academic year in Canada essentially seeks to achieve the following objectives:

1. *To offer innovative training characterised by scientific-technical excellence, adapted to the candidate's areas of interest and tailored to their needs.*
2. *The enjoyment of an international educational, family and social experience, which will enhance their ability to adapt to a different environment, broaden their perspective in a globalised world and provide them with a command of the English language.*

The second-year training curriculum in leadership, technology and entrepreneurship is in turn composed of the following two programmes:

- *The Leaders of the Future Seminar (LFS), an intensive three-day leadership event that will inspire them to become the next generation of social and business leaders in Spain.*
- *The Sputnik programme, a plan structured into two two-day seminars at which they will be presented with the technologies that are set to change the world, which will inspire and motivate them to create the start-ups of the future.*

The new interns this year were María Carmona Díaz, from Albox; Ezequiel Fernández Martínez and Eloy Teruel Casanova, both from Olula del Río, and Daniel López Gil, from Almería. They are all studying in the 2025-2026 academic year in the Canadian school district of Nova Scotia.

OTHER CONTRIBUTIONS TO THE WORLD OF ART AND CULTURE

ARCO MADRID

Mesura, a studio in Barcelona, designed the Guest Lounge for ArcoMadrid 2025, and chose Cosentino surfaces for their sustainable nature and the Company's commitment to circularity. A shade from the Earthic collection by Silestone® and the colour Sirius by Dekton® covered a large part of the fixtures used in the main hall and in the restaurant area, as part of its "A new landscape" project.

PHOTOGRAPHY CONTEST

The Company, together with Fujifilm Spain, launched the first edition of the Architecture and Interior Design Photography contest "X-SPACE PHOTO CONTEST" in 2025, which was a huge success with more than 1,400 files submitted and nearly 600 contestants. It is an initiative that seeks to pay tribute to architecture, interior design and the creative vision of the professionals who work in these disciplines.

GRANADA FESTIVAL

In 2025, Cosentino sponsored one of the most attractive and eagerly awaited concerts of the Granada Festival, which brought the 74th edition of the event to a close. The Palacio de Carlos V was the setting for the recital given by the Stuttgart Symphony Orchestra SWR, conducted by Pablo Heras-Casado, with the young French maestro Alexandre Kantorow at the piano.

ALMERÍA FILM FESTIVAL (FICAL)

The Company maintained its relationship with the Festival as one of its main sponsors, and sponsored the Award for Best New Director in the Opera Prima section, which went to Eva Libertad for her film "Sorda".

COLLABORATION IN THE "SU MAJESTAD ESCOJA" EXHIBITION

Cosentino was the main partner for the exhibition "Su Majestad Escoja: the ornamental rock sample collection of the Royal Palace of Madrid", the first of a new format of exhibitions promoted by Patrimonio Nacional under the title "Collections Revealed", which was exhibited in the Royal Collections Gallery. The exhibition presented eight wooden chests containing 301 types of marble of all colours, textures and national geographical origins from the 18th century, which were made available to the architects of the Royal Palace in Madrid.

BIODIVERSITY AND NATURE

WE TAKE STEPS TO RESTORE NATURAL AREAS TO THEIR ORIGINAL STATE, TO THE EXTENT POSSIBLE.

Environmental restoration as a key component of responsible natural resource management in extractive activities

Cosentino's primary objective in its mineral extraction activities is to mitigate the impacts generated during the extraction and processing phases, ensuring that the intervened areas recover, as far as possible, their ecological, landscape, and socio-economic functions. To this end, a set of planned actions is implemented, developed progressively or upon completion of mining activities.

Cosentino demonstrates its regulatory compliance in environmental restoration by integrating authorized Restoration Plans into its operations. Likewise, the company maintains sufficient financial guarantees to ensure the full execution of restoration works, which require that such guarantees cover all activities necessary for the recovery of the environment.

This commitment is further reinforced through the implementation of complementary actions aimed at value creation and the circular economy at all levels.

In 2025, Cosentino's mining area continues to increase the recovery of waste materials derived from ornamental stone, transforming these rejects into certified raw materials to be used in industrial minerals processes as recycled products or as certified materials for civil works. In this way, resource utilization is maximized, and the waste remaining in the quarry as inert material is reduced to a minimum.

None of Cosentino's sites are located in areas where there are nearby protected habitats or places of special environmental interest.

ESG

(G) COSENTINO X GOVERNANCE

WE WORK TO ENSURE THAT SUSTAINABILITY AND TRANSPARENCY
ARE BUILT INTO OUR BUSINESS MANAGEMENT.

At Cosentino Good Governance is our shared culture.

At Cosentino, we do not just use an efficient management model that reflects our commitment to maximum transparency. We go much further. We are committed to good governance: to acting ethically and with determination, to establishing honest relationships, to treating others as equals, to giving the best of ourselves, both individually and collectively. This applies to all levels and areas of Cosentino, from our chairman to those who have only recently signed their first contracts following internships. Because we all make decisions every day, both big and small, that affect the world around us.

We each have a great deal to contribute to the Good Governance culture at Cosentino.

Every link in the chain is important in terms of the positive impact we aim to generate in every area of the company.

Our Good Governance principles also extend to our suppliers and collaborators. We surround ourselves with people and companies that share our goal to make a positive impact, requiring of them exemplary ethics and best practices in sustainability.

GOOD GOVERNANCE

RESPONSIBLE TAXATION

Cosentino's corporate tax policy is based on compliance with fiscal regulations, cooperation with the various tax authorities, collaboration in the prevention of tax fraud, commitment to society and tax transparency.

Our approach to tax-related matters is inspired by the following principles:

1. Compliance with the tax regulations in the various countries in which the Group operates, paying the taxes due in line with the legislation applicable in each country.

*As regards the **Transfer Pricing Policy**, we value related-party transactions in accordance with the OECD guidelines on this matter, submitting a country-by-country report in Spain, where the Group's parent company is resident for tax purposes.*

In this regard, the Group will never artificially shift profits from one jurisdiction to another for the purpose of eroding tax bases and minimising the tax burden.

2. Fostering reciprocally cooperative relationships with the different **tax authorities**.

Our relationships with the different tax authorities are based on trust, good faith and collaboration, and we prioritise out-of-court resolution of tax disputes.

The advance pricing arrangements entered into by the Spanish and US tax authorities, and agreements regarding the assignment of intangible assets with the Spanish State Tax Agency, are testament to our cooperative relationships with the tax authorities.

3. Collaboration to prevent and combat tax fraud, avoiding the use of contrived structures not connected with the Group's business activity for the sole purpose of reducing the tax burden.

In this connection, the Group has no presence in territories classed by the European Union as non-cooperative jurisdictions for tax purposes.

4. Tax governance.

In 2022 the Group approved a tax compliance policy that constitutes the internal organisation model for taxation matters, based on monitoring compliance with tax obligations.

5. Contribution and social impact of taxes paid. *We are aware of our responsibility with respect to the social and economic development of the countries in which we operate and that the taxes paid by the Group help to support both of these processes.*

6. Tax transparency. *Since 2015 we have been voluntarily disclosing the taxes paid in the countries in which we operate.*

In 2025 we paid a total of 57.2 million in taxes at Group level, while collecting 318.4 million in third-party taxes generated in the pursuit of our economic activity, this being one of our main contributions to shoring up public spending and, by extension, to society. The increase in tax payments is strongly influenced by the recently introduced tariffs in the United States.

CYBERSECURITY

During 2025, Cosentino has continued with the ISO 27001 certification to guarantee its customers good security practices against possible cyber-attacks. These guarantee the confidentiality, integrity and availability of information and provide the following advantages:

Guarantee of trust and business quality: demonstrates to the market that our data processing processes are secure.

Improvement of the internal security system: thanks to the methods and procedures detailed in the standard for its optimal compliance, a system will be created that will offer the highest security for internal information.

Reduction of risk cases: the implementation of this security management system allows to reduce exponentially the cases of leakage or deterioration of information.

COMPLIANCE

OUR ETHICAL COMPLIANCE CULTURE IS BASED ON THE FOLLOWING PRINCIPLES:

 Respect for the law We pursue our activities in strict compliance with the laws in force in each of the markets in which we operate.	 Ethical integrity Our day-to-day work is grounded in integrity and pursued in accordance with the principles of honesty, avoidance of all forms of corruption and respect for the specific circumstances and needs of all those involved.	 Respect for human rights All of our activities scrupulously observe the human rights and civil liberties included in the Universal Declaration of Human Rights. The values set out in our Code of Ethics form part of the culture shared by all Cosentino Group employees, who must all be familiar and comply with such document.
--	--	---

Our Compliance Body and Ethics Channel are the main cornerstones of our organisational compliance system and ensure observance of these basic principles while fostering a genuine culture of regulatory compliance, ethical commitments and best practices within the organisation.

ZERO TOLERANCE OF BRIBERY AND CORRUPTION.

Our Prevention of Bribery and Corruption Policy - updated in May 2025 - expresses our firm commitment to transparency, ethical values and legality.

Our Prevention of Bribery and Corruption Policy - updated in May 2025 - expresses our firm commitment to transparency, ethical values and legality.

The basic tenets of this Policy are:

- 1. Refrain from tolerating, permitting or engaging in any behaviour that constitutes corruption, in any shape or form, while conducting business or professional activities, or in dealings with the public or private sector.*
- 2. Foster a preventive culture based on “zero tolerance” towards corruption in business and bribery, as well as towards the commission of other acts constituting any type of fraud.*
- 3. Adopt appropriate measures to ensure that dealings between professionals working for Group companies and any public administration, authorities, civil servants and other persons involved in the exercise of public functions are always governed by the principles of cooperation, transparency and honesty.*
- 4. Have specific procedures in place to prevent any action that could be deemed an act of corruption, the application of which shall be supervised by the Group's Compliance Body.*
- 5. Implement training programmes and appropriate communication plans for Group professionals with sufficient regularity to ensure that their knowledge of the Policy's subject matter is kept up to date.*

As part of the Annual Audit Plan, the Internal Audit Department conducts tests to assess the level of compliance with the company's internal procedures.

With regard to monetary transactions, prevention and control measures are in place to ensure compliance with the company's procurement process (Purchase to Payment), with a range of controls across the various stages, limitation of the number of users able to generate payment orders and restriction to the least possible number of people with banking powers of attorney, which in the majority of cases are subject to a joint signature requirement.

The primary aim of our Anti-Money Laundering Policy is to establish a Group-wide compliance framework that all companies must apply when conducting their activities, business and relationships, both domestically and internationally, in order to prevent money laundering and terrorist financing, and to comply with any applicable international sanctions and financial countermeasures programmes.

WE HAVE ONE GOAL: TRANSPARENCY AND INTEGRITY IN ALL OUR DEALINGS.

The Compliance Body carries out periodic reviews of Cosentino's compliance system in order to ensure that it is aligned with legal requirements, recommendations and best practices in the area. We are determined to achieve the highest standards in terms of both expectations and quality.

This continuous development has led to the decision to restructure and modernise the regulatory compliance function, providing it with full-time resources, and complete autonomy and independence. In this connection, since 2024, the regulatory compliance function has been entrusted to a single-person body (the Chief Compliance Officer), who reports directly to the Board of Directors, via its Delegated Audit and Control Committee.

The Chief Compliance Officer's main functions include:

- *Promoting and instilling strict compliance with the law and a genuine culture of regulatory compliance by incorporating ethics into every activity undertaken at Cosentino.*
- *Raising awareness of, and ensuring compliance with, the Code of Ethics, Conduct and Regulatory Compliance, a set of standards constituting the backbone of the organisation, and the other policies that together form the compliance system.*
- *Ensuring compliance with the ten principles of the Global Compact.*
- *Ensuring observance of the Compliance Policy.*
- *Regularly reviewing and updating the documents constituting the Compliance system (including the criminal and regulatory risk matrix and compliance controls).*
- *Developing and implementing an annual training plan and reporting it to the organisation.*
- *Handling communications and queries received through the Ethics Channel.*
- *Resolving any conflicts of interest that might arise in the course of the Group's business activities.*
- *Advising any employees or members of the organisation.*

ETHICS CHANNEL

We have an Ethics and Compliance section on the corporate website, where the Ethics Channel and the most relevant policies in this regard can be found.

COMPOSITION OF THE COMPLIANCE BODY

Chief Compliance Officer
Álvaro Fernández Vázquez

A TRAINED WORKFORCE WITH A SHARED GOAL

To achieve our goal of maximum transparency and complete integrity, it is essential that we are all working towards the same goal. With this in mind, each year we run training sessions to raise awareness of compliance risks, the activities in which they could arise and how to prevent, detect and manage them.

We also seek to increase the visibility of the Ethics Channel and encourage its use to report any conduct that might hinder our efforts to remain a responsible and fair company.

ALWAYS VIGILANT

We must all remain vigilant with respect to both the company's conduct and our own in order to prevent compliance breaches and reduce existing risks. To this end, we have in place an Ethics Channel, which is essential to a culture of regulatory compliance.

This channel is available to all employees and stakeholders on the corporate website. The Compliance Body can also be contacted by email, by letter, in person, or by phone.

The Ethics Channel provides a confidential and anonymous (where so required) means of reporting irregular or unethical conduct relating to any case of non-compliance or violation of the Code of Ethics, Conduct and Regulatory Compliance or any compliance-related rule, policy or protocol, as well as any conduct that may constitute a criminal offence. In addition, it is an advisory tool where any employee or third party can request advice on the application of any policy or procedure that forms part of the organisation's regulatory framework.

Communications received are analysed, categorised and processed by the Compliance Body having regard to their nature.

Cosentino's zero retaliation policy ensures the confidentiality of all communications and protection of whistleblowers acting in good faith.

22 communications were received in 2025. All of them have been dealt with and none were related to cases of bribery or corruption. Similarly, no complaints were received in respect of human rights violations.

Number of communications received in 2025

- Queries
- Inappropriate behaviour
- Fraud
- Harassment
- Property rights

DATA PROTECTION OFFICE

Cosentino has a Data Protection Office that is responsible for managing any requests for the exercise of rights, carrying out data protection impact assessments in new projects if needed and controlling the register of processing activities.

This Office also has a legal advisor and systems technician to ensure that we comply with both the General Data Protection Regulation and the new Spanish Data Protection Act. In this same vein, we have set up a Data Protection Committee (DPC) to verify that the actions carried out by the data protection officer are correct..

CERTIFICATION

WE ARE AN EXAMPLE OF EFFECTIVE MANAGEMENT, CERTIFIED BY LEADING ORGANIZATIONS IN KEY AREAS OF SUSTAINABILITY.

We are an example of effective management, certified by leading authorities in key areas of sustainability.

One of Cosentino's fundamental pillars is our customers' trust. Keeping stakeholder needs uppermost in our minds, we perform our work with careful regard to safety, respect for the environment, quality and the use of efficient and innovative techniques and methods, all in accordance with the company's values and principles.

Consequently, within a framework of operational excellence, we are committed to integrating our management systems, and continuously maintaining and improving the Integrated Management System (IMS), which has been certified according to the highest international standards.

IN 2025, THE FOLLOWING CERTIFICATIONS WERE RENEWED:

- ISO 9001:2015: Quality Management System. A standard aimed at satisfying customers' needs through the appropriate management of internal processes.
- ISO 14001:2015: Environmental Management System. This standard provides a framework for the design, implementation and continuous improvement of our environmental performance.
- ISO 45001: 2018: Occupational Health and Safety Management System. This standard implies the creation of a safe, healthy workplace for the people forming part of the Group and anyone entering our facilities.
- ISO 50001:2018: Energy Management System. This standard provides specific guidelines for implementation by the organisation of short- and long-term measures that will have a positive impact on all stakeholders.
- ISO/IEC 27001:2013: Information Security Management System. The aim of this standard is to minimise risks and guarantee the confidentiality, integrity and accessibility of information.
- In 2025, we secured a B-score in the CDP rating.

WE ALSO RENEWED THE FOLLOWING CERTIFICATIONS IN THE PURCHASING AREA:

- ISO 20400:2017: Sustainable Procurement Management System.
- UNE 15896 2015: Value-added Purchasing Management.
- These certifications are a testament to our commitment to follow best market practices with regard to purchasing management and continuous improvement, as well as to sustainability. We received an Excellent rating in the audit.

NEW CERTIFICATIONS RECEIVED IN 2025:

- ECLOS® has been verified by the certification body Intertek for three of its main characteristics: improved resistance to thermal shock, a guaranteed minimum content of 50% recycled material, and being a low-silica material (with less than 1% crystalline silica content). Other certifications that endorse our products include.

OTHER CERTIFICATIONS ENDORSING OUR PRODUCTS:

→ Dekton by Cosentino®

UL Greenguard and UL Greenguard Gold, NSF, BBA (British Board of Agreement), ETA (European Technical Assessment), ICC-ES, NOA, QB UPEC (France), IMO and USCG; Environmental Product Declaration (EPD), DECLARE, SASO; recycled material content; REACH compliance.

→ Silestone by Cosentino®

UL Greenguard and UL Greenguard Gold; IAC Gold; NSF; Environmental Product Declaration (EPD); DECLARE; DNV Declaration of Verification for Hybriq Technology® and Hybriq+®; Recycled material content; REACH compliance

→ Sensa by Cosentino®

UL Greenguard and Greenguard Gold

HUMAN RIGHTS

GUARANTEEING HUMAN RIGHTS IS EVERYONE'S DUTY

We demand the utmost commitment to the Universal Declaration of Human Rights, to the legislation in force in each country and to honesty as the governing principle of our conduct.

We believe that responsibility for respecting human rights lies with each and every one of the individuals and bodies subject to the Code of Ethics, Conduct and Regulatory Compliance. We have accepted the Declaration of Fundamental Principles and Rights at Work, the ILO Conventions, the OECD Guidelines for Multinational Enterprises and the United Nations Global Compact, among others, as our basic guidelines in terms of conduct.

Through our Code we also undertake to respect the UN Universal Declaration of Human Rights, as well as to eliminate child labour, requiring all our employees, collaborators and suppliers to strictly observe this principle as well as all the other principles that guide us. Meeting this requirement is a prerequisite to become a certified supplier.

In addition, as part of the General Procurement Conditions and by way of our Supplier and Risk Management Policy, suppliers undertake to meet a number of criteria of this nature, which are verified through our own audits of the main suppliers to ensure compliance. Moreover, any instance of alleged breach of the conducts set out in our Code must be reported.

SUPPLIERS

TOGETHER WE GENERATE A POSITIVE IMPACT THROUGHOUT OUR VALUE CHAIN

*We build constructive relationships
with our suppliers: relationships that
are responsible, sustainable and strong.*

We work with people and companies that share our values and commitments, with integrity and transparency at all times. We carry out different initiatives designed to establish long-lasting relationships built on trust:

- *We continue to roll out initiatives that align the purchasing function with the requirements of ISO 20400 on sustainable procurement, a standard for which we have been recertified this year, once again achieving an Excellent rating. We have also successfully passed the UNE 15896 audit on Value Added Purchasing, consolidating our strategy of ongoing improvement in the purchasing function.*
- *Compliance with our Supplier and Risk Management Policy is key, both to mitigate potential negative impacts on the activity of the Cosentino Group and to encourage the development of ESG criteria in our supply chain.*

This compliance will be bolstered by the ESG assessments carried out by our partner Ecovadis, a reputable third-party global leader in sustainable supplier assessments, through which we will assess our critical and strategic suppliers.

Our responsibility in terms of products begins with how we select and obtain raw materials.

Our assessment of the level of performance and compliance of our suppliers is an ongoing part of the procurement process. We do so by way of an annual Audit Plan and making on-site verifications of the conditions of our raw material suppliers in relation to environmental, social and good governance criteria, also supervising the quality of the process and the product and the basic conditions in terms of Health and Safety.

These assessments take into account aspects such as the publication of a corporate social responsibility report, the existence of gender equality and human rights policies or codes of ethics and conduct among the supplier's policies, or whether the supplier's environmental management system is certified. Accordingly, they not only guarantee the quality of the products, but also analyse factors such as respect for human rights, ensuring that child labour is not used and that labour standards align with our internal policies and current legislation.

In 2025, we conducted 30 audits, mainly in Spain, China and Turkey, of which 22 were closed without any breaches and 5 closed with breaches. Action is being taken in connection with these breaches. Three suppliers did not pass the audit, with three non-conformities identified; these suppliers are currently in the qualification process.

The strategic agreement with Ecovadis will help us to further mitigate our supply chain risks, while ensuring that our suppliers are in step with the constant legal changes across the different geographical regions.

Through the Service Monitoring Office, we continue to assess the performance of our main suppliers by defining and monitoring SLAs and strategic initiatives that help to make the services they provide to us more operationally and economically efficient.

17,859

total number of active suppliers

4,215

1,882

local suppliers Almeria, Andalusia, Spain (11% of total)

Raw material supply.

We continue to audit our raw material suppliers on an annual basis, either in person or online. Based on ESG criteria, these audits add value to the monitoring of our suppliers' indicators and mitigate risks of breaches relating to human rights, the environment or governance. In 2025, it was also mandatory for assessment by Ecovadis, further mitigating the risks that our suppliers may face.

Spain	39%
Turkey	34%
China	10%
Italy	5%
Portugal	5%
France	2%
Hong Kong	2%
Swiss	1%
United Arab Emirates	1%

WE ENSURE THAT OUR SUPPLIERS ARE ALIGNED WITH OUR ESG VISION.

Our ISO 20400 sustainable procurement certification, and the collaboration with Ecovadis to assess our critical and strategic suppliers, are the main drivers that help us to promote the development of environmental, social and governance criteria in our supply chain.

From the Supplier and Process Management area we promote and convey this need via the ESG Academy, with the support of the ESG Champions—procurement managers selected to take part in the transformation of their procurement portfolios working closely with suppliers.

The continuous alignment of our supplier approval process with the seven core subjects of ISO 26000 remains key to ensuring coverage of all relevant issues. Our ESG Criteria Questionnaire, which is mandatory and must be adopted by all suppliers considered critical or strategic, has been reviewed to ensure alignment with the various legislative frameworks, such as the European Due Diligence Law.

The final average ESG performance score of all our critical suppliers at year end reached 76%.

CUTOMERS

KNOWLEDGE SHARING
FOR AN ENHANCED EXPERIENCE.

At Cosentino we are aware of the diversity of our customers. We therefore listen to all of their needs with a view to achieving a product that meets market quality standards and expectations.

Understanding the perception our partner customers (marble workers, installation companies, builders, etc.) have of our products and that of the end users who benefit from our materials in their daily lives is of equal importance to us. The Customer Care department has two ways to collect customer feedback on product quality.

Firstly, we have the Customer Support technical team that visits our customers' sites to gather all the information regarding the stages prior to the installation and use of the product. Secondly, we have the Voice of Customer team, which is able to understand and convey to the internal teams, through a centralised complaint management service, how the material performs once it is brought into use.

We also offer a technical assistance service to our partner customers in the event they encounter difficulties in the development, design or installation of our products. This service is likewise for new customers who are facing fresh challenges with Cosentino's latest products. To this end, we have assembled a team of more than 20 international technicians to provide this service in all of our markets, either locally or from our headquarters.

As regards complaints management, 21,167 complaints were handled in 2025, with the following outcome distribution:

21,167

Total incidents reported

71%

Complaints accepted

26%

Complaints rejected

3%

Draft complaints

STATUS OF CLAIMS

Approved	Claims resolved favorably for the customer
Denied	Claims denied to the customer
Pending Management	Claims pending resolution

WE DEMONSTRATE OUR COMMITMENT TO COMMUNICATION THROUGH ACTIONS

We continue to roll out communication initiatives to keep our customers and society informed, providing them with all information available.

In order to share information on the possible risks related to our products and the pertinent preventive measures, in 2019 we created the Cosentino Health & Safety Space website, accessible from any device. It has since been updated, and today it is the point of reference for health and safety information on our products that is user-friendly, structured and multilingual, in accordance with international regulations such as the Globally Harmonised System (GHS) for the classification and labelling of chemical products and mixtures, as well as CLP, REACH and others.

The up-to-date safety data sheets (SDS) for our Silestone®, Silestone® XM, ECLOS®, Dekton®, Deklite®, Sensa®, Scalea®, and Natural Stone products can be found on the osh.cosentino.com website.

Continuing with the practice introduced in 2017, Cosentino also regularly distributes multilingual newsletters to marble workers globally, with relevant information on the prevention of occupational risks in their professional activity linked to our products. This practice continued throughout 2025, the newsletter being translated into 13 languages and with certified delivery in 38 countries..

→ International Health&Safety info

Labelling information

1. Crystalline silica content.
2. Stipulation of the obligation to comply with applicable local health and safety regulations and to consult an industrial hygienist to implement all appropriate risk mitigation measures.
3. Warnings regarding the risks and precautions to be taken for safe handling of these products, together with the corresponding pictograms, in compliance with international GHS regulations.
4. Reference to the existence of adequate processes to mitigate emissions and ensure safe product disposal.
5. Indications on possible health issues arising from prolonged exposure to dust from cutting and handling materials without recommended safety measures
6. QR code that directs users to the Cosentino Health & Safety Space, where they can find additional health and safety information, safety data sheets and good practice guidelines in a downloadable format, and video demonstrations on how to safely handle products.

WE OPEN CHANNELS OF DIALOGUE TO IMPROVE COMMUNICATION WITH OUR STAKEHOLDERS.

Service Desk

Cosentino has worked to improve its customer service by internalising the Service Desk and Workplace teams, thereby demonstrating our commitment to generating quality employment and providing enhanced customer support.

This has enabled us to offer a more dynamic in-person service that is adapted to the pace of our business, providing direct customer care, which in turn enhances customer satisfaction with the service received from our Company.

Social media

Our GloCal (global and local) strategy has been consolidated as a key pillar for amplifying the presence of our brands within the digital ecosystem, fostering active, close, and relevant communication with customers and strategic audiences, particularly in the fields of design and architecture.

We currently have an active community of more than 2.7 million followers across the main social media platforms (Instagram, Facebook, LinkedIn, Twitter, Pinterest, and YouTube). Through our content and activations, we reached 27 million users in 2025, positioning Social Media as a strategic channel to strengthen engagement with our audience and enhance the value of our brands at a global level.

Our digital presence combines local content—projects, collaborations, and market-specific initiatives—with global content that reinforces our corporate identity. Through 33 local profiles on Instagram and other platforms, we connect with our community in more than 18 languages, showcasing product launches and strategic milestones such as our participation in leading design and architecture events, as well as major sports and cultural events, both locally and internationally.

In 2025, Pinterest took on a leading role, achieving millions of monthly visits thanks to content generated through our official channel, consolidating this platform as a key space for inspiration and engagement with industry professionals.

Cosentino Showrooms: City y Studios

With the aim of strengthening our connection with specifiers (architects and designers) and end customers, in 2025 we continued to position the Cosentino City network and launched the new Cosentino Studio concept as strategic pillars within the company's global design and specification ecosystem.

The Studio format complements the City spaces, acting as a more proximity-focused environment, optimized in size, accessible, and oriented toward the local capture of projects. Studios work in coordination with the City spaces to enhance inspiration, planning, and conversion.

We remain present on the most relevant social media platforms, such as Instagram, LinkedIn, and Google My Business, in order to communicate our values, projects, and initiatives, for example by sharing the agenda of our design-focused events.

Inside our showrooms, we offer both physical and digital tools to showcase our materials in different dimensions and sizes, as well as digital visualizers of slabs and project renderings, allowing users to explore our colors and elements. In this way, we present all the possibilities for diversification across our full range of Dekton®, Silestone® and Sensa® colors.

PARTNERS

WE TEAM UP WITH PARTNERS AND ENTITIES THAT SHARE THE SAME VISION

We always maintain an active policy of collaboration that leads us to form alliances and join forces with entities that share our values. Entities that are committed to innovation, sustainable development, industry advancement and social responsibility. These include the following:

- Fundación SERES (Society and Responsible Company (SERES) Foundation).
- Asociación de Empresarios del Mármol de Andalucía (Association of Marble Companies of Andalusia, AEMA).
- Asociación Mobiliario de Cocina (Association of Kitchen Furniture, AMC).
- Asociación Directivos de Comunicación (Association of Communication Executives and Managers, DIRCOM).
- Asociación para la defensa de la Marca (Andema) (Association for the defense of the Brand).
- Club de Marketing de Almería (Almeria Marketing Club).
- Foro de Marcas Renombradas Españolas (Leading Brands of Spain Forum).
- Federación Andaluza de Promotores Inmobiliarios – Fadeco (Andalusian Federation of Real Estate Developers – Fadeco)
- ASCER (Spanish Ceramic Tile Manufacturers' Association).
- Asociación para el Progreso de la Dirección (Association for the Progress of Management, APD).
- Asociación Española de Anunciantes (Spanish Association of Advertisers).
- AMBIT - Living Spaces Cluster.
- CENFIM (Professional Training Institute).
- A.St.A. World-Wide (Engineered Stone Manufacturers Association).
- Asociación SUSTENTA (Environmental Civic Association).
- Confederación Española de Organizaciones Empresariales (CEOE) (Spanish Confederation of Business Organisations).
- ICEX (Spanish Institute for Foreign Trade)
- Green Building Council España (GBCe).
- European Construction and sustainable built environment Technology Platform (ECTP).
- Asociación Española de Fabricantes de Fachadas Ligeras y Ventanas (ASEFAVE) (Spanish Association of Manufacturers of Lightweight Facades and Windows).
- Asociación para el desarrollo de la sílice y productos derivados (IBERSIL) (Partnership for the development of silica and silica products).
- Confederación Española de las Industrias de las Materias Primas Minerales (PRIMIGEA) (Spanish Confederation of the Mineral Raw Materials Industries).
- EUROSIL (European Association of Industrial Silica Producers).
- Industrial Minerals Europe (IMA Europe).
- NEPSI (European Network for Silica).
- EIT RawMaterials
- Plataforma de Economía Circular en Acción (Circular Economy in Action platform).
- StepbyWater Alliance.
- Alianza para la FP Dual (Professional Training Alliance).
- Observatorio Industrial 4.0. (Industry 4.0 Observatory).
- Observatorio 2030 del CSCAE (CSCAE 2030 Observatory).
- CESUR (Professional Training Centre).
- Design Institute of Spain (D!OS).
- Consejo Superior de Colegios de Arquitectos de España (Higher Council of Professional Associations of Architects of Spain, CSCAE).
- Fundación Arquitectura y Sociedad (Architecture and Society Foundation).
- Fundación Arquitectura Contemporánea (Contemporary Architecture Foundation).
- Federación Española del Habitat (Spanish Habitat Federation).
- CEAJE (Spanish Federation of Young Entrepreneurs).
- Cámara de Comercio España-EE.UU. (Spain-US Chamber of Commerce).
- Fundación Consejo España-Estados Unidos (United States-Spain Council Foundation).
- Fundación COTEC (COTEC Foundation for innovation and technological development).
- Círculo de Empresarios (Businessmen's Circle).
- Cercle d'Economia (Economia Circle).
- Asociación para el Estudio de Monarquías Contemporáneas (REMCO) (Association for the Study of Contemporary Monarchies).
- Cámara Oficial de Comercio de España en Bélgica y Luxemburgo (Official Spanish Chamber of Commerce in Belgium and Luxembourg).
- Instituto de Empresa Familiar (IEF) (Family Business Institute).
- Pacto Mundial ONU España (UN Global Compact Spain).
- European Alliance for Apprenticeships (EAfA).
- Asociación de fabricantes y distribuidores (AECOC)
- Asociación europea A. SPIRE

APPENDICES

APPENDIX 1. CIRCULAR ECONOMY

TABLES SHOWING % OF RECYCLED RAW MATERIALS IN PRODUCTS IN 2025
(EXPRESSED IN TERMS OF CONSUMPTION OF RAW MATERIALS (TONNES))

Product lines	Total Raw Materials (t) Recycled/Recovered	Total Raw Materials (t) Consumed	% Recovered / Recycled vs. Total
Dekton®	23,745	271,231	8.75%
Silestone®	53,330	398,443	13.38%
TOTAL	77,075	669,674	11.51%

2025 marked our sixth year operating our own non-hazardous waste treatment and valorisation plant through our subsidiary Soluciones Ambientales COMA.

Regarding the management of hazardous waste, we continue to research waste management alternatives that prioritise valorisation of waste over disposal, as well as new commercial products that can gradually replace the hazardous products used in production.

Performance: Global: Cantoria Industrial Complex (Almería, Spain) + Latina Factory, Vitória (Brazil)

Change in the valorisation of solid waste (t)	2023	2024	2025
Total waste	332,563	347,849	354,014
Total valorisation	54,796	54,445	60,769
Valorisation rate (%)	16.48%	15.65%	17.17%

NOTE: In 2025, material codes not included in 2023 and 2024 are incorporated.

APPENDIX 2.

ENERGY CONSUMPTION

Silestone® + Dekton®	2023	2024	2025
Total electricity consumption (kWh)	185,007,973	186,785,153	191,090,536
Total thermal energy consumption (kWh)	372,501,970	446,801,944	461,225,054
Total energy consumption (kWh)	557,509,943	633,587,097	652,315,590

DIESEL CONSUMPTION	2023	2024	2025
Total consumed (litres)	1,044,492	1,015,091	1,097,893
Total consumed (kWh)	10,495,369	10,201,670	11,033,825

ENERGY CONSUMPTION OUTSIDE THE CANTORIA HQ

	Category	Item	Consumption	Comments
Stone Systems	Stationary combustion	Fuel used in facilities	5,453,061.04 kWh	Natural gas and propane
	Electricity	Grid consumption	5,542,978 kWh	
Cosentino Centers	Stationary combustion	Fuel used in facilities	9,216,422.89 kWh	Natural gas and propane
	Electricity	Grid consumption	6,047,598.27 kWh	
City Centers	Stationary combustion	Fuel used in facilities	151,526.24 kWh	Natural gas
	Electricity	Grid consumption	1,256,206.89 kWh	
Logistics hubs	Stationary combustion	Fuel used in facilities	743,885.04 kWh	Natural gas and propane
	Electricity	Grid consumption	1,088,798.69 kWh	
Brazil factory	Stationary combustion	Fuel used in facilities	920,306.48 kWh	Natural gas
	Electricity	Grid consumption	6,165,828 kWh	

*Some electricity consumption data for sites outside Cantoria have been estimated based on 2024 information. These data represent 0.4% of Cosentino's total electricity consumption.

APPENDIX 3.

EMISSIONS OF OTHER SUBSTANCES

	2022	2023	2024	2025
Carbon monoxide (CO) (kg/year)	58,400	73,500	75,916	84,364
Nitrogen oxides (NOx) (kg/year)	102,000	106,000	110,137	93,620
Lead and compounds (Pb) (kg/year)	0.7	1.74	4.0	0.98
Total suspended particles (TSP) (Kg/year)	20,500	58,900	79,785	30,979
Total organic carbon (TOC) (kg/year)	33,800	53,000	63,871	62,319
Hydrofluoric acid (HF)	817	6	35	40

APPLICATION OF THE PRECAUTIONARY PRINCIPLE

Aware of the importance of preventing negative impacts as a result of our production processes and facilities, we apply the precautionary principle with a view to protecting the environment.

Over the course of 2025 work continued to implement the improvements and recommendations agreed with insurer Swiss Re, notably the improvements associated with insulation and fuel risk reduction, as well as the control of chemicals and conditioning of other products that do not pose a risk to industrial activities.

APPENDIX 4.
CARBON FOOTPRINT

Total footprint 2025	Tonnes (t)
Direct emissions	112,852.63
Indirect energy emissions	6,168.85
Indirect transport emissions	122,952.52
Indirect emissions from products and services	269,324.68
Indirect emissions from use of products	23,660.56
TOTAL	534,959.23

**Cosentino, S.A. also submits its Carbon Footprint to a subsequent verification process by an independent third party, in accordance with ISO 14064-1:2019 and ISO 14064-3:2019 standards.*

50.34% of our footprint in 2025 is due to indirect emissions associated with the Products and Services category, arising primarily from the consumption of the various raw materials that we use.

In second place, constituting 22.98% of the total, are indirect emissions associated with transport, arising from the bulk of our product distribution and from the transportation of raw materials.

In third place are direct emissions, representing 21.10% of the total, most of which arise from our production processes.

If an objective and quantified comparison is made between the 2018 and 2025 footprint indicators, the accumulated reduction stands at 7.5%. Compared to the previous year, 2024, there is an increase of 2.3%.

APPENDIX 5.

EMPLOYEES

* The tables below present the data as of the end of the fiscal year, with average data not being reported, as there is no seasonality in our business segment and the total workforce remains constant throughout the year.

Employees by contract type and gender in 2025

Contract type/working hours	Men	Women	Overall total
Open-ended	4,283	1,498	5,781
Full time	4,274	1,468	5,742
Part time	9	30	39
Temporary	90	13	103
Full time	37	10	47
Part time	53	3	56
Overall total	4,373	1,511	5,884
Dismissals	215	97	312

Employees by contract type and age in 2025

Contract type/working hours	Under 25	25 to 35	35 to 45	45 to 55	Over 55	Overall total
Open-ended	236	1,534	1,945	1,470	596	5,781
Full time	234	1,530	1,926	1,457	595	5,742
Part time	2	4	19	13	1	39
Temporary	3	22	14	6	58	103
Full time	3	22	14	4	4	47
Part time				2	54	56
Overall total	239	1,556	1,959	1,476	654	5,884
Dismissals	12	90	100	80	30	312

EMPLOYEES BY CONTRACT TYPE AND PROFESSIONAL CATEGORY IN 2025

Contract type/working hours/level	Senior management	Directors	Supervisors	Skilled professionals	Admin.	Factory workers	Overall total
Open-ended	20	92	905	1,821	251	2,692	5,781
Full time	20	91	901	1,805	242	2,683	5,742
Part time		1	4	16	9	9	39
Temporary			5	27	5	66	103
Full time				22	3	22	47
Part time			5	5	2	44	56
Overall total	20	92	910	1,848	256	2,758	5,884
Dismissals		3	45	134	21	109	312

NUMBER OF EMPLOYEES BY COUNTRY 2025

Country	No. of employees	Country	No. of employees
Spain	3,539	Austria	18
United States	1,114	Norway	18
Brazil	236	Ireland	16
United Kingdom	121	United Arab Emirates	14
Canada	117	Japan	12
France	95	Denmark	11
Italy	84	Malaysia	9
Australia	74	Finland	9
Germany	50	Lithuania	8
Portugal	40	South Africa	8
Poland	39	Czech Republic	6
Sweden	36	Peru	5
Mexico	32	Indonesia	4
Turkey	27	Croatia	3
Netherlands	25	Estonia	2
Israel	25	Hungary	2
Belgium	21	Latvia	1
Singapore	20		
New Zealand	20		
Switzerland	18		

APPENDIX 6.

TAX TRANSPARENCY AND SUBSIDIES

The table below details the amounts of corporate income tax paid per country (€)

Country	Corporate income tax paid	Country	Corporate income tax paid
United States	11,436,110	Germany	191,520
Canada	712,187	Denmark	138,428
Italy	576,521	Belgium	127,063
United Kingdom	513,250	France	117,528
Spain	277,460	Australia	111,186
Netherlands	261,341	Brazil	104,717
Switzerland	227,041	Swiss	103,049
Portugal	195,646	Other countries*	656,117
TOTAL	15,749,164		

*Aggregate amount corresponding to income tax paid by subsidiaries in Austria, Ireland, Norway, Singapore, Turkey, Israel, Japan, Dubai, Finland, New Zealand, Poland, Malaysia, Mexico, Puerto Rico, Lithuania, Slovenia, Hungary, the United Arab Emirates, and Peru.

Income tax paid includes the net amount of tax cash flow, covering both corporate income tax payments (relating to the current year and prior years) as well as tax refunds received for that tax from previous years. It also includes payments/refunds arising from tax audit assessments and from withholding taxes borne abroad.

In the United States, it is important to note that the final installment payment on account of corporate income tax for 2024 was deferred to 2025. For this reason, the total amount of income tax paid in 2025 is higher than usual.

Grants received in 2025:

	2023	2024	2025
Balance at 1 January	19,904,798	18,151,182	38,293,509
Grants received during the year	3,996,986	30,261,945	14,442,660
Decrease in grants received in prior years	(3,482,756)	(1,552,048)	(5,609,407)
Amounts transferred to the income statement	(2,267,846)	(8,573,852)	(6,772,180)
Translation differences	-	6,282	(11,486)
Balance at 31 December	18,151,182	38,293,509	40,343,096

APPENDIX 7.

SOCIAL DIALOGUE

Social dialogue: trade union partnership.

Article 1 of the Spanish Trade Union Freedom Act 11/1985 of 2 August 1985 guarantees that all workers have the right to freely join trade unions for the promotion and defence of their economic and social interests.

Article 2 of the same act stipulates that trade union freedom comprises:

- The right to establish trade unions without prior authorisation, as well as the right to suspend or dissolve them through democratic procedures.
- The right of workers to join the trade union of their choice on the sole condition of observing the union bylaws or withdrawing from union membership. Furthermore, no one may be forced to join a trade union.
- The right of members to freely elect their representatives within each trade union.
- The right to trade union activity.

This right is enshrined in both the Workers' Statute and the Collective Bargaining Agreement.

Composition of the workers' representatives at Cosentino (Cantoria work centre).

The workers at Cosentino's Cantoria Industrial Complex are represented as follows:

- (i) The C1 works council is made up of 23 members who were elected in March 2022, of which 12 members belong to the Unión General de Trabajadores (UGT) trade union while 11 members belong to the Comisiones Obreras (CCOO) trade union.
- (ii) The C2 works council is composed of 12 members (1 vacancy) who were elected in December 2022. All council members belong to the CCOO trade union.
- (iii) The office workers' council comprises 13 members elected in 2022. All council members belong to the CSIF trade union.

Discrimination and harassment.

Non-discrimination is a key factor in our commitment to employee welfare.

We do not tolerate discrimination of any kind, be it on grounds of birth, race, sex, religion, opinion or any other condition or personal or social circumstance; we are firmly committed to

preventing and eradicating this type of behaviour. We are all equal, and we all contribute to Cosentino's mission.

Harassment is also considered a workplace risk. At Cosentino, we strive to maintain an organisational structure that prevents harassment, and we undertake to allocate the human and material means to prevent it and to take action against possible cases of harassment.

Our protocol, which sets out our intention to implement all necessary measures to promote a harassment-free working environment, has been distributed to all members of staff.

We also have a Whistleblower Channel at Cosentino that all employees and stakeholder personnel can access to report or make inquiries about discrimination or harassment issues. This Channel enables users to anonymously report issues to the Compliance Body, which is responsible for its management.

Cosentino Cantoria (park 1, park 2 and Cosentino Global's work centre at Cantoria) has several committees currently in place:

- Health and Safety Committee.
- Training Committee
- Harassment Investigation Committee.
- Equality Committees (Negotiating Committee and Monitoring Committee once the plan is approved).

There are also three trade union sections in industrial park 1:

- UGT trade union section.
- CCOO trade union section.
- Solidaridad trade union section.

APPENDIX 8.

COLLECTIVE BARGAINING

In 2025, 67.6% of employees worldwide are covered by a collective bargaining agreement, an increase of 1.6 percentage points on last year's coverage. Our employees in Spain, where 60% of our workforce is based, are all signed up to one of the 26 existing collective agreements.

The Collective Bargaining Agreements in force at Cosentino's work centres in Spain on matters affecting occupational health and safety refer to the application of the provisions contained in the Law on Occupational Risk Prevention, without providing for improvements to the conditions legally established in the applicable regulations.

Country	Employees	No. employees covered by collective bargaining agreement	% employees covered by collective bargaining agreement
Spain	3,539	3,539	100%
Brazil	236	236	100%
France	95	95	100%
Netherlands	25	25	100%
Italy	84	84	100%
Austria	18	18	100%
Belgium	21	21	100%
Germany	50	16	32%
Other countries*	1,816	0	0%
TOTAL	5,884	4,034	68.6%

(*) Germany: Bavaria state only

(**) Other countries: Saudi Arabia, Australia, Canada, Croatia, Denmark, the United Arab Emirates, Estonia, Finland, Hungary, Indonesia, Ireland, Israel, Japan, Latvia, Lithuania, Malaysia, Mexico, Norway, New Zealand, Peru, Poland, Portugal, Puerto Rico, the United Kingdom, the Czech Republic, Singapore, South Africa, Sweden, Switzerland, Turkey, the USA.
